Financial Statements in IFRS

June 30, 2019

(A free translation of the original in Portuguese)

Independent auditor's report

To the Board of Directors and Stockholders Itaú Unibanco Holding S.A.

Opinion

We have audited the accompanying financial statements of Itaú Unibanco Holding S.A. ("Bank") and its subsidiaries, which comprise the consolidated balance sheet as at June 30, 2019 and the consolidated statements of income, comprehensive income, changes in stockholders' equity and cash flows for the six-month period then ended, and the consolidated statements of income, comprehensive income and cash flows for the quarter ended June 30, 2019, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of the Bank and its subsidiaries as at June 30, 2019, and the consolidated financial performance and cash flows for the six-month period and quarter then ended, in accordance with the International Accounting Standard (IAS) 34 - Interim Financial Reporting issued by the International Accounting Standards Board (IASB).

Basis for opinion

We conducted our audit in accordance with Brazilian and International Standards on Auditing. Our responsibilities under those standards are further described in the "Auditor's Responsibilities for the Audit of the Consolidated Financial Statements" section of our report. We are independent of the Bank and its subsidiaries in accordance with the ethical requirements established in the Code of Professional Ethics and Professional Standards issued by the Brazilian Federal Accounting Council, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the quarter and six-month period then ended. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Our audit for the six-month period ended on June 30, 2019 was planned and executed considering that the operations of the Bank and its subsidiaries did not present significant modifications in relation to the previous year. In this context, the Key Audit Matters, as well as our audit approach, have remained substantially in line with those of the previous year.

Why it is a key audit matter

How the matter was addressed in the audit

Matters

How the

matter was

addressed

Why

it is a key audit matter

Classification and measurement of financial assets and liabilities and provision for expected loss in accordance with IFRS 9 - Financial Instruments (Notes 2.3(c), 2.3(h), 5 to 10)

The adoption of IFRS 9 - Financial Instruments, which took place in January 2018, replacing IAS 39 - Financial Instruments, had as its main consequences: (i) the change in the criteria for recognition of the provision for loans from incurred loss to expected loss; and (ii) review of the classification and measurement criteria of financial assets and liabilities. Itaú Unibanco Holding S.A. continues to apply the hedge accounting policies set forth in IAS 39, as permitted by IFRS 9.

The provision for expected loss continued to be an area of focus in our audit, as it involves Management's judgment in classifying credits at the stages set forth in IFRS 9 - Financial Instruments, as well as in determining the necessary provision through the application of methodology and processes which use a variety of assumptions, including the counterparty's financial condition, expected future cash flows, estimated recoverability and collateral realization.

The classification and measurement of financial assets pursuant to IFRS 9 (Note 2.4 d) is carried out based on businesses models and in the features of the related cash flows (Solely Payment of Principal and Interest Test – SPPI Test).

The financial instruments classified as fair value through profit or loss include operations with low liquidity and no active market, which are substantially comprised of securities issued by companies and by derivative contracts. The fair value measurement of these financial instruments We confirmed our understanding of the process of classification and measurement of financial assets and liabilities and the provision for expected loss in accordance with IFRS 9.

Regarding the impairment methodology, we performed a number of audit procedures related to the: i) analysis of management's accounting policies in comparison with IFRS 9 requirements; ii) the understanding and testing of controls related to the measurement of the provision for expected loss, which considers data, models and assumptions adopted by Management; iii) tests on the models, including their approval and validation of assumptions adopted to determine the estimated losses and recoveries. In addition, we tested the guarantees, the projected cash flows, the credit renegotiations, the counterparty's risk assessment, the payment delays, and other aspects that could result in a significant increase of the credit risk, as well as the classification of operations in their proper stages, pursuant to IFRS 9; iv) tests on inputs to models and, when available, we compared data and assumptions with market information; and v) analysis over Management's disclosures in the financial statements in order to comply with IFRS 7 Financial Instruments: Disclosures and IFRS 9.

We consider that the criteria and assumptions adopted by management in determining and recording the provision for expected loss are appropriate and consistent, in all material respects,

Why it is a key audit matter

involves subjectivity, since it depends on valuation techniques performed based on internal models that include Management assumptions in their fair valuation.

These matters also continued to be a focus of our audit due to the relevance and subjectivity mentioned above.

How the matter was addressed in the audit

in the context of the financial statements.

Regarding the classification and measurement of financial assets and financial liabilities, we highlight certain audit procedures:

- i) Analysis of Management's accounting policies in comparison with IFRS 9 requirements;
- ii) Understanding and testing of Management's process to assess the business models applied and the contractual cash flows that are the basis for the "Solely Payment of Principal and Interest Test – SPPI Test";
- iii) We updated our understanding of the valuation methodology used for these financial instruments and the assumptions used by Management, by comparing them with independent methodologies and assumptions. We performed, on a sample basis, the valuation of certain operations and compared the assumptions and methodologies used by Management with our knowledge of the commonly used valuation practices, as well as we analyzed the consistency of such methodologies with those applied in prior periods.

We believe that the criteria and assumptions adopted by Management to measure the fair value of these financial instruments and derivatives are appropriate and consistent with the disclosures in the accompanying notes to the Financial Statements.

Information technology environment

Itaú Unibanco Holding S.A. and its subsidiaries rely As part of our audit procedures, with the support of on their technology structure to process their operations and prepare their financial statements. Technology represents a fundamental aspect on the evolution of the Bank's business and, over the last years, significant short and long-term investments have been made in the information technology systems and processes.

Due to the history of acquisitions and size of the related operations, the technology structure is comprised of more than one technology environment with different processes and segregated controls.

The lack of adequacy of the general controls of the technology environment and of the controls that depend on technology systems may result in the

our specialists, we assessed the information technology environment, including the automated controls of the application systems that are significant for the preparation of the financial statements.

The procedures performed comprised the combination of relevant control tests and, when necessary, the tests of compensating controls, as well as the performance of tests related to the information security, including the access management control and the segregation of duties.

The audit procedures applied resulted in appropriate evidence that was considered in determining the nature, timing and extent of other audit procedures.

Why it is a key audit matter

How the matter was addressed in the audit

incorrect processing of critical information used to prepare the financial statements, as well as risks related to information security and cybersecurity. Accordingly, this continued as an area of focus in our audit.

Deferred Tax (Notes 2.4 (j) e 24(b))

The deferred tax assets arising from temporary differences, income tax losses carryforward and negative basis of social contribution are recorded to the extent Management considers probable that Itaú Unibanco Holding S.A. and its subsidiaries will generate future taxable profits. The projection of the future taxable profits takes into account a number of subjective assumptions established by Management.

We continue to consider this an area of focus of our audit, as the use of different assumptions in the projection of future taxable profits could significantly change the amounts and terms expected for the realization of deferred taxes, with consequent accounting impact.

We confirmed our understanding and tested the design and the effectiveness of the main controls established by management to calculate the deferred tax assets and the recording of such credits in accordance with the accounting standards, including the necessity of analyzing the perspectives for the realization of these assets via projections of future taxable profit.

We tested the design and the effectiveness of the main controls over the respective disclosures. We also compared the critical assumptions used for projecting future results with macroeconomic information disclosed by the market and with the historical data in order to support the consistency of these estimates.

With the support of our specialists in the tax area, we performed tests on the nature and amounts of the temporary differences, fiscal losses and negative bases of social contribution, subject to future tax deduction.

We believe that the assumptions adopted by Management in the determination and recording of deferred tax assets are appropriate and consistent with the disclosures in the accompanying notes to the Financial Statements.

Realization of goodwill and intangible assets (Notes 2.3 (b), 2.4(aIII), 2.4 (h), 3 to 14)

The balances of intangible assets are tested semiannually for impairment. These tests involve estimates and significant judgment, including the identification of cash-generation units. The determination of expected cash flows and the risk-adjusted interest rate for each cash-generating unit or group of cash-generating units requires that management apply judgment and estimates.

We continued focusing on this area in our audit

We confirmed our understanding and tested the design and effectiveness of the main controls established, including the analysis of the critical judgment and assumptions used by management.

We tested projections for the determination of impairment of intangible assets that management prepared, focusing on the most significant cases, such as intangible assets arising from the acquisition of Itaú Corpbanca, in order to

Why it is a key audit matter

because: (i) it involves the projection of future results, in which using different assumptions may significantly modify the perspective of realization of these assets and the possible need to account for impairment, with consequent impact on the financial statements; and (ii) of the relevance of intangible assets arising from the acquisition of Itaú Corpbanca.

How the matter was addressed in the audit

corroborate the reasonableness of these realization estimates.

We believe that the assumptions that management adopted to evaluate the realization of intangible assets are appropriate and that the disclosures in the accompanying notes are consistent with the information obtained.

Provision for contingent liabilities (Notes 2.3(j), 2.4.(n) e 29)

Itaú Unibanco Holding S.A. and its subsidiaries have contingent liabilities mainly arising from judicial and administrative proceedings, inherent to the normal course of their business, filed by third parties, former employees, and public agencies, involving civil, labor, tax, and social security matters.

In general, the settlement of these proceedings takes a long time and involve not only discussions on the matter itself, but also complex process-related aspects, depending on the applicable legislation. In certain situations, the legislation allows taxpayers to settle certain tax proceedings in advance by decreasing or eliminating related interest rates and fines. Civil and labor legislation also permits that agreements are made to settle proceedings in advance.

During the 1st semester of 2019, efforts continued to be made to sign the settlement instruments for the settlement of civil lawsuits related to economic plans.

Besides the subjective aspects in determining the possibility of loss attributed to each case, the evolution of case law on certain causes is not always uniform. Considering the materiality of the amounts and the uncertainties and judgments involved, as described above, in determining and recording the provision for contingencies and required disclosures, we continue to consider this an area of audit focus.

We confirmed our understanding and tested the design and the effectiveness of the main controls used to identify, assess, monitor, measure, record, and disclose the provision for contingent liabilities, including the totality and the integrity of the database.

Civil and labor proceedings are divided on a group basis and on an individualized basis. Proceedings considered under a group basis are quantified based on internal models and are revalued considering the judicial decisions on the related matters.

Regarding the individualized proceedings, the calculation is made periodically based on the determination of the amount of the request and on the likelihood of a loss, which is estimated according to the characteristics, in fact or in law, related to each sentence in particular.

We tested the models used to quantify judicial proceedings of civil and labor natures considered on a group basis. We were supported by our specialists in the labor, legal, and fiscal areas, according to the nature of each proceeding.

Also, we performed external confirmation procedures with both internal and external lawyers responsible for the proceedings.

We considered that the criteria and assumptions adopted by Management for determining the provision for contingent liabilities, as well as the information disclosed in the financial statements, are appropriate.

Other matters

Statements of added value

The consolidated statements of added value for the six-month period and quarter ended June 30, 2019, prepared under the responsibility of the Bank's management and presented as supplementary information for IFRS purposes, was submitted to audit procedures performed in conjunction with the audit of the Bank's financial statements. For the purpose of forming our opinion, we evaluated whether these statements are reconciled with the financial statements and accounting records, as applicable, and if their form and content are in accordance with the criteria defined in Technical Pronouncement CPC 09 - "Statement of Added Value". In our opinion, these statements of added value has been properly prepared, in all material respects, in accordance with the criteria established in the Technical Pronouncement and is consistent with the financial statements taken as a whole.

Other information accompanying the financial statements and the auditor's report

The Bank's management is responsible for the other information that comprises the Management Report.

Our opinion on the financial statements does not cover the Management Report, and we do not express any form of audit conclusion thereon.

In connection with the audit of the financial statements, our responsibility is to read the Management Report and, in doing so, consider whether this report is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement in the Management Report, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of management and those charged with governance for the consolidated financial statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with the International Accounting Standard (IAS) 34 - Interim Financial Reporting issued by the International Accounting Standards Board (IASB), and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Bank's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Consolidated or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Bank's and its subsidiaries financial reporting process.

Auditor's responsibilities for the audit of consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Brazilian and International Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and

are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Brazilian and International Standards on Auditing, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit
 procedures that are appropriate in the circumstances, but not for the purpose of expressing an
 opinion on the effectiveness of the internal control of the Bank and its subsidiaries.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Bank's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Bank to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether these consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements.
 We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the six-month period ended June 30, 2019 and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

São Paulo, July 29, 2019

PricewaterhouseCoopers Auditores Independentes

CRC 2SP000160/O-5

Emerson Laerte da Silva

Contador CRC 1SP171089/O-3

Dear Reader,

The previous Management Report drew attention to the importance of customer centricity as as a guiding thread to all of our strategic fronts¹. We mentioned the adoption of principals and rituals to achieve our objective of changing leagues: to be among the world's best companies in customer satisfaction.

We have embarked on a series of initiatives aimed at improving our customers' experience and, consequently, their degree of satisfaction and loyalty (NPS²). These initiatives adhere to the rituals (Listen to the Customers, Engage the Team, and Transform Experiences) we have established in our working environment.

During the second quarter of 2019, we continued to develop our practices of listening to and strengthening the bonds with our **customers**. We believe change moves outwards, which is why the goal of our initiatives is to enhance not only our customer's satisfaction, but also that of our employees and the way we work.

customer

CENTRICITY AS
THE GUIDING THREAD
changing leagues

Customer at center

Through our communities, we have created an integrated working model of our employees. Using this new structure as the starting point, we have begun dedicating more time and resources exclusively to enhance our customers' satisfaction (NPS).

We have structured the Customer Executive Forum consisting of periodic management meetings whose focus is on integrating the initiatives of the "customer centricity" strategic front with all our management areas. The forum's objectives are:

To analyze customer satisfaction

To take decisions regarding customer centricity and our strategic fronts

To monitor the customer centricity initiatives

To analyze what we do and how we can improve

We have implemented the "Can I help you?" program, in which our officers experience the day-to-day work in the branches and become involved in all functions involving customer relations. The purpose of this experiment is to get to know the point of view of both the customer and the employee, making it possible to identify opportunities for improving customer service and for renovating the manner in which we create products and services.

For example, our president and CEO organized lines, handed out numbered tickets and personally attended to customers of a branch in Diadema, São Paulo.

¹ Our six strategic fronts are People Management, Customer Centrality, Digital Transformation, Sustainable Profitability, Risk Management and Internationalization.

² Net Promoter Score: measures the degree of customer satisfaction and loyalty.

Thinking about the experience of our customers who visit our physical branches, we created the Branch Transformation model. Based on actively listening to our customers and employees:

- > We have invested in improving the architecture of our branches to create more open and inviting surroundings;
- > We have embraced digital transformation by improving technologies and functionalities, such as removing revolving doors, providing Wi-Fi access, envelope-free deposit services and self-service.

We have launched a new customer service model at the digital branches for customers of Itaú Empresas, who can count on dedicated managers to support them, build the relationship and search for solutions in response to their objectives, thereby actively participating in the growth of each business.

The innovations and transparency brought about by the digital economy now mean that people and businesses relate to money in a different way, while searching for greater freedom of choice. In this context, in May 2019 we launched the *iti* (Itaú, technology and innovation) pilot project, a platform that has reinvented the pay-and-receive experience.

The *i i* platform waives the need for card machines and physical cards to make payments in commercial establishments or between people using QR Code®.

This technology enables cash to be added, free issuance of giro transfers and registration of credit cards of any institution to make payments and transfers. As it is 100% digital and not linked to in-branch service, *iti* enables a significant reduction in the transaction fees charged to storeowners.

Given the increasing number of customers operating digitally, we have expanded our investments in technological enhancements to afford our customers the convenience they seek.

We have also made it possible to purchase US Dollars and Euros on the Itaú app, free of charge, 24 hours a day. The exchange rate is guaranteed at the time of purchase, with immediate payment via debit to a current account. The customer also receives notification on their app, or by SMS, reminding them of the deadline for picking up the currency at the branch.

We have simplified our vehicle financing process by converting the iCarros site (our vehicle classified ads portal) into a credit analysis tool, with fewer fields to be filled out by customers on sites, and requiring just three items of information: taxpayer identity (CPF), e-mail and mobile telephone number. Such strategy resulted in a significant jump in the monthly number of customers filling out proposals.

To make our customers' shopping experience even more complete, the *Mercado Livre* website, Visa and Itaú have launched a cost-free international credit card that uses contactless technology and returns 10% of the value of purchases made at 970 official *Mercado Livre* stores.

The card can be used at any Internet or physical store, and enjoys the benefits of Itaucard. Purchases with the card on *Mercado Livre* can also be paid in 15 interest-free instalments, in addition to obtaining *Mercado Pontos* (loyalty program) benefits.

Hand in hand with technology, we continued to implement initiatives in people management.

During our Diversity Week, we launched a campaign stressing that differences are not obstacles; rather they are characteristics that differentiate people who, together, are responsible for fostering a better performance by the bank and greater respect in society. Our discussions about inclusion cover various aspects such as race, gender, age, sexual orientation, disabilities and religion.

From June 25 to 27, we held lectures about how the culture of inclusion creates innovation, the scenario and the rights of LGBT+ people, how to deal with discrimination and prejudice in the workplace, diversity and inclusion in society, and sharing stories of our employees.

This set of initiatives comprises an agenda for a long-term strategy that has contributed to the sustainability of our results. In the first half of 2019, our net income was R\$ 13.6 billion, representing an increase of 9.2% over the same period of 2018, and an annualized recurring return of 21.7% over Shareholders' Equity.

We give below the main indicators comprising this result:

In R\$ billions	1H19	1H1	Variation		
Income Information					
Banking Product	57.0	48.	5	17.4%

¹⁾ Sum of Banking Services Fees and Result from Insurance, Pension Plan and Premium Bonds Operations before Retained Claims and Selling Expenses, net of reinsurances; (2) The return is calculated by dividing the Recurring Net Income by the Average Stockholders' Equity. The quotient of this division was multiplied by the number of periods in the year to arrive at the annual ratio. The bases for calculating the returns were adjusted for the proposed amount of dividends after closure of the balance sheet still pending approval by the general meeting of shareholders or at board meetings. (3) Includes the balance of allowance for financial guarantees provided and corporate securities; (4) For the period of June 2018 it is considered the immediate and full application of the Basel III rules and the proforma impact of the investment in XP (-80bps). (5) Values of 1H18 were adjusted by the 50% stock split.

From January to June 2019, there was a 9.4% increase in net income attributable to owners of the parent company in comparison to the same period of the previous year, mainly due to the growth of the banking product. If we adjust the banking product to the fiscal effect on the hedge instruments for our investments abroad, the main drivers to the increase of the banking product are:

- Our revenues from banking services increased by 4.1%, mostly driven by increases of 14.0% in asset management fees and by increases of 2.4% in fees from credit and debit card services.
- Our credit portfolio, including financial guarantees provided and corporate securities, reached R\$663.2 billion at the end of June 2019, representing an increase of 5.7% over the same period of 2018, mainly due to the 18.4% growth of very small, small and middle-market companies and 13.6% of individuals loan portfolios.

Capital management is an essential component of our management model, because through it we strive to optimize how we invest our shareholders' funds and ensure the solidness of the bank.

These objectives are reflected in our capital ratio and dividend distribution policies that stipulate a minimum Tier 1 ratio of 13.5%. Thus, distributions of earnings are conditional on this limit, the growth outlook for the business, the profitability for the year, mergers and acquisitions, changes in the market as well as fiscal and regulatory changes that could affect capital requirements.

In the first half of 2019 our Tier 1 capital ratio was 14.9%.

On July, 29, our Board of Directors approved the payment of additional dividends in the amount of R\$ 7.7 billion and 0.7869 per share. The payment will be on August 23, 2019 and will be considered the shareholders position as of August 15, 2019.

The dividend paid, accrued or identified at the Stockholders' equity on the first half of 2019 grew 60.8% in comparison to the first half of 2018.

For further information on Dividends visit our Investor Relations website: itau.com.br/investor-relations > Announcements to the Market > Material Facts.

With a view to governance and transparency with the market, we hold the cycle of APIMEC¹ meetings at which we invite together investors to discuss, primarily, our results strategies and the macroeconomic context.

In the first half of the year, the investors' interest in the capital market increased, reflected in:

- > A 13.5% increase in the number of participants at the APIMEC meetings², to 1.3 thousand people.
- > A 43% increase in the number of shareholders, to 215.3 thousand.

We wish to invite our investors to participate at our next APIMEC Meetings:

City	Date
Rio de Janeiro	August 12
São Paulo	September 3
Fortaleza	September 12
Porto Alegre	September 18

For further information regarding the APIMEC meetings, visit our Investor Relations website: itau.com.br/investor-relations > Presentations and Events > APIMEC Meetings.

¹Association of Capital Market Investment Analysts and Professionals.

² Florianópolis, Curitiba, Londrina, Campinas, Santos, Salvador, Recife, Goiânia, Uberlândia, Ribeirão Preto, Belo Horizonte and Brasília.

The Renewal of the Share Repurchase Program - took effect from May 31, 2019, authorizing the acquisition of up to 15 million common shares (ITUB3) and up to 75 million preferred shares (ITUB4) issued by us, with no reduction in the capital stock, to be held in treasury, cancellation or reallocation in the market. In percentage terms, the figures equate to 0.3% and 1.6% of the total shares in free float in the market, respectively. Itaú Corretora de Valores S.A. will intermediate the purchases, which can be made until November 30, 2020.

Our commitment to transparency and accountability is directly related to the attention we allocate to our shareholders and investors. We pay special attention to communicating with these stakeholders by continually investing in enhancing our contact channels and in the quality of the services that we provide.

We were the first Investor Relations web site in Brazil to have a dedicated podcast for the investing public, Investcast, which can be accessed on our landing page (itau.com.br/relacoes-com-investidores), as well as on Spotify, iTunes and Deezer.

In May, we rolled out a new platform for comments and analyses of the main economic issues in Brazil, Itaú Views – Macro & Research, a weekly podcast dedicated to analyzing the macroeconomic scenario in Brazil, sectoral evaluations and the stock market.

We took first place in five out of the eight categories in the "Institutional Investor – 2019 Latin America" award: Best CEO, Best Investor Relations Program, Best ESG, Best Investors' Meeting and Best Website.

During the first half of 2019, we published our principal regulatory documents, including Form 20F of the Securities and Exchange Commission (April 30, 2019) and the Reference Form of the Brazilian Securities Commission (May 31, 2019). To view these documents, go to itau.com.br/relacoes-com-investidores > Reports.

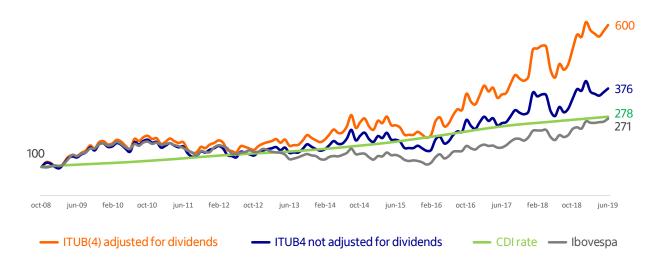

Average Daily Trading Volume of Shares (R\$ million)

Our stock continues to trade with a high level of liquidity, with an increase of 62% in the average daily trading volume since 2017, with growth on the local market (B3) having attained 69% in the same period. Currently, 53% of the average daily volume is traded on B3 and 47% on the NYSE.

Evolution of R\$ 100 invested on the date preceding the announcement of the merger (10/31/2008) until 06/30/2019

The graph below shows the evolution of investments from the day preceding the announcement of the merger (October 31, 2008), until June 30, 2019, comparing the price of our preferred stock (ITUB4) with and without the reinvestment of dividends, with the performance of the Ibovespa Index and the CDI rate.

For example, a shareholder who purchased R\$100 in shares at the end of October 2008, reinvesting the dividends on those shares, would have R\$600 at the end of June 2019, which represents more than twice the return of the CDI rate accrued in the same period (R\$278). On the other hand, had the shareholder not reinvested the dividends, their investment would have reached R\$376.

Acknowledgements

We wish to reiterate our gratitude to our employees for their commitment and dedication that have enabled us to leverage our results; and to our customers and shareholders for their interest and trust they have placed in us.

(Approved at the Meeting of the Board of Directors on July 26, 2019).

Independent Audit - CVM Instruction No. 381

Procedures Adopted by the Company: our operating policy, including subsidiaries, when contracting non-external audit-related services from our independent auditors, is based on applicable regulations and internationally accepted principles that protect the independence of the auditors. These principles state that: (a) the auditors must not audit their own work, (b) the auditors must not hold managerial positions at their clients and (c) the auditors must not promote their clients' interests.

In the period from January to June 2019, we did not contract from the independent auditors or their related parties services unrelated to the external audit in an amount exceeding 5% of the total fees regarding external audit services.

As per CVM Instruction No. 381, we list below the other services provided and the dates on which they were contracted:

- January 3 issuance of the report of the of income tax calculation and settlement;
- January 3 and April 11 issuance of the report of the review of income tax calculation and settlement;
- January 18 and April 26 review of compliance with the regulations applicable to transfer pricing;
- January 31 review of the Tax Accounting Books;
- March 8 and April 23 acquisition of technical materials and training;
- April 26 diagnosis and analysis of the impact of the new regulations.

Justification of the Independent Auditors PricewaterhouseCoopers: The provision of non-external audit-related services described above does not affect either independence or objectivity in conducting external audit examinations at Itaú Unibanco e and its subsidiaries. The policy for providing Itaú Unibanco with non-external audit-related services is based on principles that protect the independent auditors' independence, all of which were observed in providing said services, including their approval by the Audit Committee of Itaú Unibanco.

Brazilian Accounting Practices (BRGAAP)

We disclosed the complete financial statements in accordance with Brazilian accounting practices (BRGAAP) at the same date of this publication, pursuant to CVM/SEP Circular Letter No. 01/13. The complete financial statements are available on the Investor Relations website of Itaú Unibanco (www.itau.com.br/investor-relations > Results Center).

The Management Report and the Financial Statements of Itaú Unibanco Holding S.A. (Itaú Unibanco or Company) and its subsidiaries for the period from January to June 2019 follow the regulations established by the National Monetary Council (CMN), in accordance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). New accounting standard IFRS 9 on financial instruments became effective on January 1, 2018. This standard introduces significant amendments to classification and measurement, impairment and hedge accounting. The most significant change resulting from IFRS 9 is how banks account for loan losses. As from IFRS 9 these will be addressed as expected rather than incurred, as before. The information presented in this material is available on the Investor Relations website of Itaú Unibanco (www.itau.com.br/investor-relations > Results Center) and on the websites of CVM and of the Securities and Exchange Commission (SEC).

(In millions of Reais, except information per share)

Note 1 - Overview

Itaú Unibanco Holding S.A. (ITAÚ UNIBANCO HOLDING) is a publicly-held company, organized and existing under the laws of Brazil. The head office is located at Praça Alfredo Egydio de Souza Aranha, 100, in the city of São Paulo, state of São Paulo, Brazil.

ITAÚ UNIBANCO HOLDING has a presence in 22 countries and territories and offers a wide variety of financial products and services to personal and corporate customers in Brazil and abroad, not necessarily related to Brazil, through its branches, subsidiaries and international affiliates. It offers a full range of banking services, through its different portfolios: commercial banking; investment banking; real estate lending; loans, financing and investment; leasing and foreign exchange businessent; mortgage loans; loans, financing and investment; lease and foreign exchange transactions. Its operations are divided into three segments: Retail Banking, Wholesale Banking, and Activities with the Market + CorporationTrading + Institutional. Further detailed segment information is presented in Note 30.

ITAÚ UNIBANCO HOLDING is a financial holding company controlled by Itaú Unibanco Participações S.A. ("IUPAR"), a holding company which owns 51.71% of the our common shares, and which is jointly controlled by (i) Itaúsa Investimentos Itaú S.A. ("ITAÚSA"), a holding company controlled by members of the Egydio de Souza Aranha family, and (ii) Companhia E. Johnston de Participações ("E. JOHNSTON"), a holding company controlled by the Moreira Salles family. Itaúsa also directly holds 39.21% of ITAÚ UNIBANCO HOLDING's common shares directly.

These consolidated financial statements were approved by the Board of Directors on July 29, 2019.

Note 2 - Significant accounting policies

2.1. Basis of preparation

The Consolidated Financial Statements of ITAÚ UNIBANCO HOLDING were prepared in accordance with the guidelines of the National Monetary Council (CMN), which require that as from December 31, 2010 annual Consolidated Financial Statements are prepared in accordance with the International Financial Reporting Standards (IFRS), issued by the International Accounting Standards Board (IASB).

These Consolidated Financial Statements were prepared in accordance with IAS 34 – Interim Financial Reporting, with the option of presenting the Complete Consolidated Financial Statements in lieu of the Condensed Consolidated Financial Statements.

In the preparation of these Consolidated Financial Statements, ITAÚ UNIBANCO HOLDING adopted the criteria for recognition, measurement and disclosure established in the IFRS and in the interpretations of the International Financial Reporting Interpretation Committee (IFRIC).

Management believes that the information included in these Consolidated Financial Statements is relevant and a faithful representation of the information used in the management of the ITAÚ UNIBANCO HOLDING.

2.2. New accounting standards changes and interpretations of existing standards

a) Accounting standards applicable for period ended June 30, 2019

- IFRIC 23 Uncertainty Over Income Tax Treatments on income tax clarifies how to apply the
 requirements for recognition and measurement of IAS 12 Income Taxes when there is uncertainty
 about the acceptance of income tax treatment by tax authorities. This interpretation is effective for the
 years beginning January 1st, 2019 and there were no relevant impacts for the Consolidated Financial
 Statements of ITAÚ UNIBANCO HOLDING.
- IFRS 16 Leases The pronouncement replaces IAS 17 Leases, and related interpretations (IFRIC 4, SIC 15 and SIC 27). It eliminates the accounting for operating lease agreements for the lessee, presenting only one lease model, that consists of: (a) initially recognizing all lease in assets (Right-of-Use Asset) and liabilities (Other liabilities) at present value; and (b) recognizing depreciation of Right-of-Use Asset and interest from lease separately in the result.

Transition to IFRS 16

ITAÚ UNIBANCO HOLDING adopted IFRS 16 under the retrospective transition method modified on January 1st, 2019, using the following criteria:

- · unified discount rate, considering a portfolio of similar agreements;
- calculation of lease liabilities and Right-of-Use Assets at present value of remaining payments; and
- · review of lease agreements and terms.

New financial subleases have not been recorded.

b) Accounting standards recently issued and applicable in future periods

- Change in Conceptual Framework In March, 2018, o IASB issued a review of the Conceptual Framework and the main changes refer to: definitions of assets and liabilities, recognition criteria, derecognition, measurement, presentation and disclosure for equity and results elements. These changes are effective for the years started on January 1st, 2020 and possible impacts are being assessed and will be completed by the date they come into force.
- IFRS 17 Insurance Contracts: The pronouncement replaces IFRS 4 Insurance Contracts and presents three approaches for valuation:
 - General Model: applicable to all contracts without direct participation features;

- Premium Allocation Approach (PAA): applicable to contracts with term is up to 12 months and with modestly complex cash flows. It is simpler than the standard model; and it can be used only when it produces results similar to those that would be obtained it the standard model was used;
- Variable Fee Approach: applicable to insurance contracts with direct participation features. The insurance contracts are substantially investment related service contracts under which an entity promises an investment return based on underlying items.

Insurance contracts must be recognized based on an analysis of four components:

- Expected Future Cash Flows: estimate of all components of cash flow of the contract, considering inflows and outflows;
- Risk Adjustment: estimate of offset required for differences that may occur between cash flows;
- Contractual Margin: difference between any amounts received before the beginning of the contract coverage and present value of cash flows estimated at the beginning of the contract;
- Discount: projected cash flows must be discounted to present value, to reflect the time value of money, at rates that reflect the characteristics of the respective flows.

This standard is effective for annual periods beginning on January 1st, 2021. Possible impacts are being assessed and the assessment will be completed by the date this standard comes into force.

2.3. Critical accounting estimates and judgments

The preparation of Consolidated Financial Statements in accordance with the IFRS requires Management to make estimates and assumptions that affect the reported amounts of assets, liabilities, and contingent assets and liabilities at the date of the Consolidated Financial Statements, due to uncertainties and the high level of subjectivity involved in the recognition and measurement of certain items.

Estimates and judgments considered more material by ITAÚ UNIBANCO HOLDING are detailed below:

a) Consolidation

Controlled entities are all those in which ITAÚ UNIBANCO HOLDING's involvement exposes it or entitles it to variable returns and can affect these returns through its influence on the entity. The existence of control is assessed continuously. Controlled entities are consolidated from the date control is established to the date on which it ceases to exist.

b) Goodwill

The adjustment of goodwill for impairment reflects Management's best estimate for future cash flows of Cash Generating Units (CGUs). These flows are subject to market conditions and uncertain factors, such as:

- Cash flows projected for periods of available forecasts and long-term assumptions for these flows;
- Discount rates, since they generally reflect financial and economic variables, such as the risk-free interest rate and a risk premium.

c) Expected Credit Loss

The measurement of expected credit loss requires the application of significant assumptions, such as:

- Term to maturity term: ITAÚ UNIBANCO HOLDING considers the maximum contractual period on which it will be exposed a financial instrument's credit risk. However, the estimated useful life of assets that do not have fixed maturity date is based on the period of exposure to credit risk. Additionally, all contractual terms are taken into account when determining the expected life, including prepayment and rollover options.
- Prospective information: IFRS 9 requires a balanced and impartial estimate of credit loss that
 includes forecasts of future economic conditions. ITAÚ UNIBANCO HOLDING uses prospective
 macroeconomic information and public information with projections prepared internally to determine
 the impact of these estimates on the calculation of expected credit loss.

- Probability-weighted loss scenarios: ITAÚ UNIBANCO HOLDING uses weighted scenarios to determine credit loss expected over a suitable observation horizon.
- Determining criteria for significant increase or decrease in credit risk: in each period of the consolidated financial statements, ITAÚ UNIBANCO HOLDING assesses whether the credit risk on a financial asset has increased significantly using relative and absolute triggers (indicators) by product and by country.

Brazilian and foreign government securities are considered to have low credit risk, in accordance with a study conducted by ITAÚ UNIBANCO HOLDING and therefore they remain in stage 1.

Significant increase in credit risk: ITAÚ UNIBANCO HOLDING assesses several factors to determine a significant increase in credit risk, such as: the counterparty, type and characteristics of the product and region in which it was contracted, considering the following objective criteria as minimum factors:

- Phase 1 to phase 2: default exceeding 30 days, except for payroll loans for public bodies, which are recognized is made after 45 days in arrears;
- Phase 2 to phase 3: default exceeding 90 days, except for the mortgage loan portfolio, for which arrears of 180 days is a parameter for phase migration.

ITAÚ UNIBANCO HOLDING assesses whether the credit risk has significantly increased on an individual or collective basis. For collective assessment purposes, financial assets are grouped based on characteristics of shared credit risk, considering the type of instrument, credit risk classifications, initial recognition date, remaining term, industry, geographical location of the counterparty, among other significant factors.

Macroeconomic scenarios: This information involves inherent risks, market uncertainties and other factors that may give rise to results different from expected, including changes in market conditions and economic policy, recessions or fluctuations in indicators different from expected.

d) Change to Financial Assets

The factors used to determine whether has been substantial change to a contract are: change to contractual cash flows and significant extensions of the term of the transaction due to the debtor's financial constraints, significant changes to the interest rate and changes to the currency in which the transaction is denominated.

e) Transfer of Financial Assets

Financial assets are written off when all their risks and benefits have been transferred. In this assessment, ITAÚ UNIBANCO HOLDING considers if: there is no obligation to make payments unless the sums in question have been received (assets); there is no prohibition on selling the assets or pledging them as guarantee; and there is no obligation to pay over all the proceeds of the assets without significant delay.

f) Derecognition of Financial Assets

When there are no reasonable expectations of recovery of a financial asset, considering historical curves, it is totally or partially derecognition concurrently with the use of the related allowance for expected credit loss, with no effect on ITAÚ UNIBANCO HOLDING's Consolidated Statement of Income. Subsequent recoveries of amounts previously written off are accounted for as income in the Consolidated Statement of Income.

g) Deferred income tax and social contribution

As explained in Note 2.4j, deferred tax assets are recognized only in relation to temporary differences and tax losses for offset only to the extent that it is probable that ITAÚ UNIBANCO HOLDING will generate future taxable profit for its use. The expected realization of deferred tax assets is based on the projection of future taxable profits and technical studies, as disclosed in Note 24.

h) Fair value of financial instruments, including derivatives

The fair value of financial instruments, including derivatives that are not traded in active markets is calculated by using valuation techniques based on assumptions that consider market information and conditions. The main assumptions are: historical data, information on similar transactions and pricing techniques. For more complex or illiquid instruments, significant judgment is necessary to determine the model used with the selection of specific inputs and, in certain cases, evaluation adjustments are applied to the model amount our price quoted for financial instruments that are not actively traded.

The methodologies used to estimate the fair value of certain financial instruments are described in Note 28

i) Defined benefit pension plan

The current amount of pension plans is obtained from actuarial calculations, which use assumptions such as discount rate, which is appropriated at the end of each year and used to determine the present value of estimated future cash outflows. To determine the appropriate discount rate, ITAÚ UNIBANCO HOLDING considers the interest rates of National Treasury Notes that have maturity terms similar to the terms of the respective liabilities.

The main assumptions for Pension plan obligations are partly based on current market conditions. Additional information is disclosed in Note 26.

i) Provisions, contingencies and legal liabilities

ITAÚ UNIBANCO HOLDING periodically reviews its contingencies. These contingencies are evaluated based on Management's best estimates, taking into account the opinion of legal counsel when there is a likelihood that financial resources will be required to settle the obligations and the amounts may be reasonably estimated.

Contingencies classified as probable losses are recognized in the Balance Sheet under Provisions.

Contingent amounts are measured using appropriate models and criteria, despite the uncertainty surrounding the ultimate timing and amounts. Provisions, contingencies and other commitments are detailed in Note 29.

k) Technical provisions for insurance and private pension

Technical provisions are liabilities arising from obligations of ITAÚ UNIBANCO HOLDING to its policyholders and participants. These obligations may be short term liabilities (property and casualty insurance) or medium and long term liabilities (life insurance and pension plans).

The determination of the actuarial liability is subject to several uncertainties inherent in the coverage of insurance and pension contracts, such as assumptions of persistence, mortality, disability, life expectancy, morbidity, expenses, frequency and severity of claims, conversion of benefits into annuities, redemptions and return on assets.

The estimates for these assumptions are based on the historical experience of ITAÚ UNIBANCO HOLDING, benchmarks and the experience of the actuary, in order to comply with best market practices and constantly review of the actuarial liability. The adjustments resulting from these continuous improvements, when necessary, are recognized in the statement of income for the corresponding period.

Additional information is described in Note 27.

2.4. Summary of main accounting practices

a) Consolidation

I. Subsidiaries

In accordance with IFRS 10 - Consolidated Financial Statements, subsidiaries are all entities in which ITAÚ UNIBANCO HOLDING holds control.

Consolidated financial statements are prepared using consistent accounting policies. Intra-Group transactions and balances are eliminated on consolidation.

In the 3rd quarter of 2018, ITAÚ UNIBANCO HOLDING started adjusting the financial statements of its subsidiaries in Argentina to reflect the effects of hyperinflation, pursuant to IAS 29 – Financial Reporting in Hyperinflationary Economies.

The following table shows the main consolidated companies, which together represent over 95% of total consolidated assets, as well as the interests of ITAÚ UNIBANCO HOLDING in their voting capital.

		Functional	Incorporation	ACTIVITY		in voting ital at	Interest in total capital at

⁽¹⁾ All foreign branches and subsidiaries of ITAÚ UNIBANCO HOLDING have the same functional currency as the parent company, except for CorpBanca New York Branch, which uses the US dollar. (2) ITAÚ UNIBANCO HOLDING controls ITAÚ CORPBANCA due to the shareholders' agreement.

II. Business combinations

In general, a business consists of an integrated set of activities and assets that may be conducted and managed so as to provide a return, in the form of dividends, lower costs or other economic benefits, to investors or other stockholders, members or participants. If there is goodwill in a set of activities and assets transferred, it is presumed to be a business.

The acquisition method is used to account for business combinations, except for those classified as under common control.

Acquisition cost is measured at the fair value of the assets transferred, equity instruments issued and liabilities incurred or assumed at the acquisition date. Acquired assets and assumed liabilities and contingent liabilities identifiable in a business combination are initially measured at fair value at the date of acquisition, regardless of the existence of non-controlling interests. When the amount paid, plus non-controlling interests, is higher than the fair value of identifiable net assets acquired, the difference will be accounted for as goodwill. On the other hand, if the difference is negative, it will be treated as bargain purchase price and the amount will be recognized directly in income.

III. Goodwill

Goodwill is not amortized, but its recoverable value is assessed semi-annually or when there is an indication of impairment loss using an approach that involves the identification of cash-generating units (CGUs) and estimates of fair value less cost to sell and/or value in use.

Cash-generating units or groups are identified at the lowest level at which goodwill is monitored for internal management purposes. Goodwill is allocated to cash flow generating units for purposes of testing for impairment.

Goodwill of associates and joint ventures is reported as part of investment in the Consolidated Balance Sheet under Investments in Associates and Joint Ventures and the recoverable amount is analyzed is carried out in relation to the total balance of the investments (including goodwill).

IV. Capital Transactions with non-controlling stockholders

IFRS 10 – Consolidated Financial Statements establishes that, changes in an ownership interest in a subsidiary, which do not result in a loss of control, are accounted for as capital transactions and any difference between the amount paid and the carrying amount of non-controlling stockholders is recognized directly in consolidated stockholders' equity.

b) Foreign currency translation

I. Functional and presentation currency

The Consolidated Financial Statements of ITAÚ UNIBANCO HOLDING are presented in Brazilian Reais, its functional and presentation currency. For each subsidiary, joint venture or investment in associates, ITAÚ UNIBANCO HOLDING defines the functional currency, as the currency of the primary economic environment in which the entity operates.

II. Foreign currency operations

Foreign currency operations are translated into the functional currency using the exchange rates prevailing on the dates of the transactions. Foreign exchange gains and losses are recognized in the consolidated statement of income, unless they are related to cash flow hedges, when they are recognized in stockholders' equity.

c) Cash and cash equivalents

Defined as cash and current accounts with banks, shown in the Consolidated Balance Sheet under the heading Cash and cash equivalents, Interbank Deposits and Securities purchased under agreements to resell with original maturities not exceeding 90 days.

d) Financial assets and liabilities

Financial assets and liabilities are initially recognized at fair value and subsequently measured at amortized cost or fair value.

I - Classification and Measurement of Financial Assets

As from January 1, 2018, ITAÚ UNIBANCO HOLDING has applied IFRS 9 – Financial Instruments classifying financial assets in the following measurement categories:

- Amortized Cost: used when financial assets are managed to obtain contractual cash flows, consisting solely of payments of principal and interest;
- Fair Value Through Other Comprehensive Income: used when financial assets are held both for obtaining contractual cash flows, consisting solely by payments of principal and interest, and for sale; and
- Fair Value Through Profit or Loss: used for financial assets that do not meet the aforementioned criteria.

The classification and subsequent measurement of financial assets depend on:

- · The business model under which they are managed;
- The characteristics of their cash flows (Solely Payment of Principal and Interest Test SPPI Test).

Business model: represents how financial assets are managed to generate cash flows and does not depend on the Management's intention regarding an individual instrument. Financial assets may be managed with the purpose of: i) obtaining contractual cash flows; ii) obtaining contractual cash flows and sale; or iii) others. To assess business models, ITAÚ UNIBANCO HOLDING considers risks that affect the performance of the business model; how the managers of the business are compensated; and how the performance of the business model is assessed and reported to Management.

When a financial asset is subject to business models i) or ii) the application of the SPPI Test is required.

SPPI Test: assessment of cash flows generated by a financial instrument for the purpose of checking whether they represent solely payments of principal and interest. To fit into this concept, cash flows should include consideration for the time value of money and credit risk. If contractual terms introduce risk exposure or cash flow volatilities, such as exposure to changes in prices of equity instruments or prices of commodities, the financial asset is classified at fair value through profit or loss. Hybrid contracts must be assessed as a whole, including all embedded characteristics. The accounting of a hybrid contract that contains an embedded derivative is performed on a joint basis, i.e. the whole instrument is measured at fair value through profit or loss.

Amortized Cost

Amortized cost is the amount for which a financial asset or liability is measured at its initial recognition, plus adjustments using the effective interest method, less amortization of principal and interest, and any provision for expected credit loss.

Effective Interest Rate

The effective interest rate is the rate that discounts estimated future receipts or payments over the expected life of a financial asset or liability.

To calculate the effective interest rate, ITAÚ UNIBANCO HOLDING estimates cash flows taking into account all the contractual terms of the financial instrument, but without including future credit losses. The calculation includes all commissions paid or received between parties to the contract, transaction costs, and all other premiums or discounts.

Interest revenue is calculated by applying the effective interest rate to the gross carrying amount of a financial asset. In the case of purchased or originated credit impaired financial assets, the adjusted effective interest rate is applied (taking into account the expected credit loss) to the amortized cost of the financial asset.

Fair Value

Fair value is the price that would be received for the sale of an asset or that would be paid for the transfer of a liability in an arm's length transaction between market players on the measurement date.

ITAÚ UNIBANCO HOLDING classifies the fair value hierarchy according to the relevance of data observed in the measurement process.

Details of the fair value of financial instruments, including Derivatives, and of the hierarchy of fair value are given in Note 28.

Average cost is used to determine the gains and losses realized on disposal of financial assets at fair value, which are recorded in the Consolidated Statement of Income as Adjustments to Fair Value of Financial Assets and Liabilities. Dividends on assets at fair value through other comprehensive income are recognized in the Consolidated Statement of Income as Dividend income when it is probable that ITAÚ UNIBANCO HOLDING's right to receive such dividends is assured.

Regular purchases and sales of financial assets are recognized and derecognized, respectively, on the trading date.

Financial assets are derecognized when rights to receive cash flows expire or when ITAÚ UNIBANCO HOLDING transfers substantially all the risks and rewards of ownership, and such transfer qualifies for derecognition. Otherwise, an assessment is necessary of whether continuing involvement related to any retained control does not prevent derecognition.

Financial assets and liabilities are offset against each other and the net amount is reported in the Balance Sheet only solely when there is a legally enforceable right to offset them and the intention to settle them on a net basis, or to simultaneously realize the asset and settle the liability.

Equity Instruments

An equity instrument is any contract that evidences a residual interest in an entity's assets, after the deduction of all its liabilities, such as Shares and Units.

ITAÚ UNIBANCO HOLDING subsequently measures all its equity instruments at fair value through profit or loss, except when Management opts, on initial recognition, to irrevocably designate an equity instrument at fair value through other comprehensive income when it is held for a purpose other than only generating returns. When this option is selected, gains and losses on the fair value of the instrument are recognized in the Consolidated Statement of Comprehensive Income and are not subsequently reclassified to the Consolidated Statement of Income, even on sale. Dividends continue to be recognized in the Consolidated Statement of Income when ITAÚ UNIBANCO HOLDING's right to receive them is assured.

Gains and losses on equity instruments measured at fair value through profit or loss are accounted for in the Consolidated Statement of Income.

Expected Credit Loss

ITAÚ UNIBANCO HOLDING makes a prospective assessment of the expected credit loss on financial assets measured at amortized cost or through other comprehensive income, loan commitments and financial guarantee contracts:

- **Financial assets:** loss is measured at present value of the difference between contractual cash flows and the cash flows that ITAÚ UNIBANCO HOLDING expects to receive;
- Loan commitments: expected loss is measured at present value of the difference between contractual cash flows that would be due if the commitment was drawn down and the cash flows that ITAÚ UNIBANCO HOLDING expects to receive;
- Financial guarantees: the loss is measured at the difference between the payments expected for refunding the counterparty and the amounts that ITAÚ UNIBANCO HOLDING expects to recover.

ITAÚ UNIBANCO HOLDING applies a three-stage approach to measuring the expected credit loss, in which financial assets migrate from one stage to the other in accordance with changes in credit risk

- Stage 1 12-month expected credit loss: represents default events possible within 12 months.
 Applicable to financial assets purchased or originated credit impaired financial assets;
- Stage 2 Lifetime expected credit loss of financial instrument: considers all possible default events. Applicable to financial assets purchased or originated credit impaired financial assets but for which credit risk has increased significantly; and
- Stage 3 Credit loss expected for credit-impaired assets: considers all possible default events.
 Applicable to financial assets purchased or originated credit impaired financial assets. The
 measurement of assets classified in this stage is different from Stage 2 due to the recognition of
 interest income by applying the effective interest rate at amortized cost (net of provision) rather
 than at the gross carrying amount.

An asset will migrate between stages as its credit risk increases or decreases. Therefore, a financial asset that migrated to stages 2 and 3 may return to stage 1, unless it was purchased or originated credit impaired financial assets.

Macroeconomic Scenarios

Prospective information is based on macroeconomic scenarios that are reassessed annually or when market conditions so require.

Changes in Contractual Cash Flows

When contractual cash flows of a financial asset are renegotiated or otherwise modified and this does not substantially change its terms and conditions, ITAÚ UNIBANCO HOLDING does not derecognize it. However, the gross carrying amount of this financial asset is recalculated as the present value of the renegotiated or changed contractual cash flows, discounted at the original effective interest rate and a modification gain or loss is recognized in profit or loss. Any costs or fees incurred adjust the modified carrying amount and are amortized over the remaining term of the financial asset.

If, on the other hand, the renegotiation or change substantially modifies the terms and conditions of the financial asset, ITAÚ UNIBANCO HOLDING derecognises the original asset and recognizes a new one. Accordingly, the renegotiation date is taken as the initial recognition date of the new asset for expected credit loss calculation purposes, and to determine significant increases in credit risk.

ITAÚ UNIBANCO HOLDING also assesses if the new financial asset may be considered as purchased or originated credit impaired financial assets, particularly when the renegotiation was motivated by the debtor's financial constraints. Differences between the carrying amount of the original asset and fair value of the new asset are immediately recognized in the Consolidated Statement of Income.

The effects of changes in cash flows of financial assets and other details about methodologies and assumptions adopted by Management to measure the allowance for expected credit loss, including the use of prospective information, are detailed in Note 32.

Transfer of Financial Assets

ITAÚ UNIBANCO HOLDING derecognizes a financial asset, or a portion of a financial asset, from its Balance sheet when it transfers substantially all the risks and rewards of ownership of the financial asset. If ITAÚ UNIBANCO HOLDING neither transfers nor retains substantially all the risks and rewards of ownership of the financial asset, it determines whether was retained control of the financial asset.

When ITAÚ UNIBANCO HOLDING retains control, it continues to recognize the financial asset to the extent of its continuing involvement in the financial asset and consideration received is accounted for as a financial liability.

II - Classification and Measurement of Financial Liabilities

Financial liabilities are initially recognized at fair value and subsequently measured at amortized cost, except for:

- Financial Liabilities at Fair Value Through Profit or Loss: this classification applied to derivatives and other financial liabilities designated at fair value through profit or loss to reduce "accounting mismatches". ITAÚ UNIBANCO HOLDING irrevocably designates financial liabilities at fair value through profit or loss in the initial recognition (fair value option), when the option eliminates or significantly reduces measurement or recognition inconsistencies.
- Loan Commitments and Financial Guarantees: see details in Note 2.4d VII.

Derecognition and Modification of Financial Liabilities

ITAÚ UNIBANCO HOLDING derecognition a financial liability from the Consolidated Balance Sheet when it is extinguished, i.e., when the obligation specified in the contract is discharged, cancelled or expires.

A debt instrument change or substantial terms modification of a financial liability is accounted as a derecognition of the original financial liability and a new one is recognized.

A substantial change to contractual terms occurs when the present value of cash flow discount under the new terms, including any rates paid/received and discounted using the original effective interest rate, is at least 10% different from discounted present value of cash flow remaining from original financial liabilities.

III - Securities purchased under agreements to resell

ITAÚ UNIBANCO HOLDING purchases financial assets with a resale commitment (resale agreements), and sells securities with a repurchase commitment (repurchase agreement) of financial assets. Resale and repurchase agreements are accounted for under Securities purchased under agreements to resell and Securities sold under repurchase agreements, respectively.

The difference between the sale and repurchase prices is treated as interest and recognized over the life of the agreements using the effective interest rate method.

The financial assets taken as collateral in resale agreements can be used as collateral for repurchase agreements it provided for in the agreements or can be sold.

IV - Derivatives

All derivatives are accounted for as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

The valuation of active hybrid contracts that are subject to IFRS 9 is carried out as a whole, including all embedded characteristics, whereas the accounting is carried out on a joint basis, i.e. each instrument is measured at fair value through profit or loss.

When a contract has a main component outside the scope of IFRS 9, such as a lease agreement receivable or an insurance contract, or even a financial liability, embedded derivatives are treated as separate financial instruments if:

- (i) their characteristics and economic risks are not closely related to those of the main component;
- (ii) the separate instrument meets the definition of a derivative; and
- (iii) the underlying instrument is not booked at fair value through profit or loss.

These embedded derivatives are accounted for separately at fair value, with variations recognized in the Consolidated Statement of Income as Adjustments to Fair Value of Financial Assets and Liabilities.

ITAÚ UNIBANCO HOLDING will continue applying all the hedge accounting requirements of IAS 39; however, it may adopt the provisions of IFRS 9, if Management so decides. According to this standard, derivatives may be designated and qualified as hedging instruments for accounting purposes and, the method for recognizing gains or losses of fair value will depending on the nature of the hedged item.

At the beginning of a hedging transaction, ITAÚ UNIBANCO HOLDING documents, the relationship between the hedging instrument and the protected items, as well as its risk management purpose and strategy. The hedge is assessed on an ongoing basis and it is determined as having been highly effective throughout all periods of the Financial Statements for which it was designated.

IAS 39 describes three hedging strategies: fair value hedge, cash flow hedge, and hedge of net investments in a foreign operation. ITAÚ UNIBANCO HOLDING uses derivatives as hedging instruments under all three hedge strategies, as detailed in Note 7.

Fair value hedge

The following practices are adopted for these operations:

- a) The gain or loss arising from the new measurement of the hedging instrument at fair value is recognized in income; and
- b) The gain or loss arising from the hedged item, attributable to the effective portion of the hedged risk, is applied to the book value of the hedged item and is also recognized in income.

When a derivative expires or is sold or a hedge no longer meets the accounting hedge criteria or in the event the designation is revoked, the accounting hedge must be prospectively discontinued. In addition, any adjustment to the book value of the hedged item must be amortized in income.

Cash flow hedge

For derivatives that are designated and qualify as a cash flow hedge, the effective portion of their gains or losses is recognized in Other comprehensive income – Cash flow hedge, and reclassified to Income in the same period or periods in which the hedged transaction affects income. The portion of gain or loss on derivatives that represents the ineffective portion or on hedge components excluded from the assessment of effectiveness is recognized immediately in income. Amounts originally recorded in Other comprehensive income and subsequently reclassified to Income are recorded in the corresponding income or expense lines corresponding to the hedged item.

When a derivative expires or is sold, when a hedge no longer meets the accounting hedge criteria or when the entity revokes the designation, any cumulative gain or loss existing in Other comprehensive income remains stockholders' equity until the expected transaction occurs or is no longer expected to occur, at which time it is reclassified to the income statement. When a forecast transaction is no longer expected to occur, the cumulative gain or loss recognized in Other Comprehensive Income is immediately transferred to the statement of income.

Hedge of net investments in foreign operations

The hedge of a net investment in a foreign operation, including the hedge of a monetary item that is booked as part of the net investment, is accounted for in a manner similar to a cash flow hedge:

a) The portion of gain or loss on the hedging instrument determined as effective is recognized in other comprehensive income;

b) The ineffective portion is recognized in income.

Gains or losses on the hedging instrument related to the effective portion of the hedge which is recognized in comprehensive income is reclassified to income for the period when the foreign operation is partially or totally sold.

V - Loan operations

ITAÚ UNIBANCO HOLDING classifies a loan as non-performing if the payment of the principal or interest has been overdue for 60 days or more. In this case, accrual of interest is no longer recognized.

VI - Capitalization plans

In Brazil they are regulated by the insurance regulator. These plans do not meet the definition of an insurance contract under IFRS 4, and therefore they are classified as a financial liability at amortized cost under IFRS 9.

Revenue from capitalization plans is recognized during the period of the contract and measured as the difference between the amount deposited by the customer and the amount that ITAÚ UNIBANCO HOLDING has to reimburse.

VII - Loan Commitments and Financial Guarantees

ITAÚ UNIBANCO HOLDING recognizes as an obligation in the Consolidated Balance Sheet, on the issue date, the fair value of commitments for loans and financial guarantees. The fair value is generally represented by the fee charged to the customer. This amount is amortized over the term of the instrument and is recognized in the Consolidated Statement of Income under the heading Revenues from Banking Services.

After issue, if ITAÚ UNIBANCO HOLDING concludes based on the best estimate, that the credit loss expected in relation to the guarantee issued is higher that the fair value less accumulated amortization, this amount is replaced by a provision for loss.

e) Investments in associates and joint ventures

I – Associates

Associates are companies in which the investor has a significant influence but does not hold control. Investments in these companies are initially recognized at cost of acquisition and subsequently accounted for using the equity method. Investments in associates and joint ventures include the goodwill identified upon acquisition, net of any cumulative impairment loss.

II - Joint arrangements

ITAÚ UNIBANCO HOLDING defines a joint arrangements when it is has rights to assets and obligations for liabilities related to the business.

ITAÚ UNIBANCO HOLDING's share in profits or losses of its associates and joint ventures after acquisition is recognized in the Consolidated statement of income. Its share of the changes in the share in OCI of corresponding stockholders' equity of its associates and joint ventures is recognized in its own capital reserves. The cumulative changes after acquisition are adjusted against the carrying amount of the investment. When the ITAÚ UNIBANCO HOLDING's share of losses in an associates and joint ventures is equal to or more than the value of its interest, including any other receivables, ITAÚ UNIBANCO HOLDING does not recognize additional losses, unless it has incurred any obligations or made payments on behalf of the associates and joint ventures.

Unrealized profits on transactions between ITAÚ UNIBANCO HOLDING and its associates and joint ventures are eliminated to the extent of the interest of ITAÚ UNIBANCO HOLDING. Unrealized losses are also eliminated, unless the transaction provides evidence of impairment of the transferred asset. The accounting policies on associates and joint ventures are consistent with the policies adopted by ITAÚ UNIBANCO HOLDING.

If its interest in the associates and joint ventures decreases, but ITAÚ UNIBANCO HOLDING retains significant influence or joint control, only the proportional amount of the previously recognized amounts in Other comprehensive income is reclassified in Income, when appropriate.

f) Commitments as lessee operations

ITAÚ UNIBANCO HOLDING leases mainly real estate properties (underlying assets) to carry out its business activities. The inition recognition occurs when the agreement is signed, in the heading Other Liabilities, which corresponds to the total future payments at present value as a contra entry to the Right-of-Use Assets, depreciated under the straight-line method for the lease term and tested half-yearly to identify possible impairment losses.

The financial expense corresponding to interest on lease liabilities is recognized in the heading Interest and Similar Expense in the Consolidated Statement of Income.

g) Fixed assets

Fixed assets are recognized at cost of acquisition less accumulated depreciation, and adjusted for impairment, if applicable. Depreciation is calculated using the straight-line method and rates based on the estimated useful lives of these assets. These rates and other information are given in Note 13.

The residual values and useful lives of assets are reviewed and adjusted, if appropriate, at the end of each period.

ITAÚ UNIBANCO HOLDING reviews its assets in order to identify whether any indications of impairment exist. The recoverable amount of an asset is defined as the higher of its fair value less costs to sell and its value in use. For the purposes of assessing impairment, assets are grouped at the lowest level for which independent cash flows can be identified (cash-generating units). The assessment may be made at an individual asset level when the fair value less the cost to sell can be reliably determined.

Gains and losses on disposals of fixed assets are recognized in the Consolidated statement of income under Other income or General and administrative expenses.

h) Intangible assets

Intangible assets are non-physical assets, including software and other assets, and are initially recognized at cost. Intangible assets are recognized when they arise from legal or contractual rights, their costs can be reliably measured, and in the case of intangible assets not arising from separate acquisitions or business combinations, it is probable that future economic benefits may arise from their use. The balance of intangible assets refers to acquired assets or those internally generated.

Intangible assets may have finite or indefinite useful lives. Intangible assets with finite useful lives are amortized using the straight-line method over their estimated useful lives. Intangible assets with indefinite useful lives are not amortized, but periodically tested in order to identify any impairment.

ITAÚ UNIBANCO HOLDING semi-annually assesses its intangible assets in order to identify whether any indications of impairment exist, as well as possible reversal of previous impairment losses. If such indications are found, intangible assets are tested for impairment. The recoverable amount of an asset is defined as the higher of its fair value less costs to sell and its value in use. For the purposes of assessing impairment, assets are grouped at the lowest level for which independent cash flows can be identified (cash-generating units). The assessment may be made at an individual asset level when the fair value less the cost to sell can be reliably determined.

ITAÚ UNIBANCO HOLDING uses the cost model to measure its intangible assets after its initial recognition.

A breakdown of intangible assets is given in Note 14.

i) Assets held for sale

Assets held for sale are recognized in the consolidated balance sheet under the line Other assets when they are actually repossessed or there is intention to sell. These assets are initially recorded at the lower of: (i) the fair value of the asset less the estimated selling expenses, or (ii) the carrying amount of the related asset held for sale.

i) Income tax and social contribution

There are two components of the provision for income tax and social contribution: current and deferred.

The current component is approximately the total of taxes to be paid or recovered during the period in question.

Deferred income tax and social contribution, represented by deferred tax assets and liabilities, are obtained based on the differences between the tax bases of assets and liabilities and the amounts reported in the financial statements at each year end.

Income tax and social contribution expense is recognized in the Consolidated statement of income under Income tax and social contribution, except when it refers to items directly recognized in Other comprehensive income, such as: tax on fair value of financial assets measured at fair value through other comprehensive income, post-employment benefits and tax on cash flow hedges and hedge of net investment in foreign operations. Subsequently, these items are recognized in income upon realization of the gain/loss on the instruments.

Changes in tax legislation and rates are recognized in the Consolidated statement of income in the period in which they are enacted. Interest and fines are recognized in the Consolidated statement of income under General and administrative expenses.

To determine the proper level of provisions for taxes to be maintained for uncertain tax positions, the approach applied, is that a tax benefit is recognized if it is more likely than not that a position can be sustained, under the assumptions for recognition, detailed in item 2.4 n.

k) Insurance contracts and private pensions

Insurance contracts are contracts under which ITAÚ UNIBANCO HOLDING accepts a significant insurance risk of the counterparty, by agreeing to compensate it if a specified uncertain future event adversely affects it. An insurance risk is significant only if the insurance event could cause ITAÚ UNIBANCO HOLDING to pay significant additional benefits in any scenario, other then those that do not have commercial substance. Additional benefits refer to amounts that exceed those that would be payable if no insured event occurred.

Upon its first-time adoption of the IFRS, ITAÚ UNIBANCO HOLDING decided not to change its accounting policies for insurance contracts, which follow the accounting practices generally accepted in Brazil ("BRGAAP").

Although investment agreements with discretionary participation characteristics are financial instruments, they are treated as insurance contracts, as established by IFRS 4, as well as those transferring a significant financial risk.

Once a contract is classified as an insurance contract, it remains as such until the end of its life, even if the insurance risk is significantly reduced during the period, unless all rights and obligations are extinguished or expire.

Note 27 provides a detailed description of all products classified as insurance contracts.

Private pension plans

Contracts that provide for retirement benefits after an accumulation period (known as PGBL, VGBL and FGB), provide a guarantee at the commencement date of the contract, of the basis for calculating the retirement benefit (mortality table and minimum interest rates). The contracts specify the annuity rates

and, therefore, the insurance risk is transferred to the issuer from the start. These contracts are classified as insurance contracts.

Insurance premiums

Insurance premiums are recognized upon issue of an insurance policy or over the period of the contracts in proportion to the amount of the insurance coverage.

If there is evidence of impairment losses with respect to receivables for insurance premiums, ITAÚ UNIBANCO HOLDING recognizes a provision, sufficient to cover this loss, based on a risk analysis of realization of insurance premiums receivable with installments overdue for over 60 days.

Reinsurance

In the ordinary course of business, ITAÚ UNIBANCO HOLDING reinsures a portion of the risks underwritten, particularly property and casualty risks that exceed the maximum limits of responsibility that we determine to be appropriate for each segment and product (after a study which considers size, experience, special features, and the capital necessary to support these limits). These reinsurance agreements allow the recovery of a portion of the losses from the reinsurer, although they do not release the insurer from the main obligation as direct insurer of the risks covered by the reinsurance.

ITAÚ UNIBANCO HOLDING mainly holds non-proportional contracts, which transfer part of responsibility to the reinsurance company for losses that will materialize after a certain level of claims in the portfolio. Reinsurance premiums of these contracts are accounted for under Other Assets, over the life of each contract.

If there is any evidence of impairment loss, ITAÚ UNIBANCO HOLDING recognizes a provision when the default period exceeds 180 days from the registration of the request for fund of claims paid.

Acquisition costs

Acquisition costs include direct and indirect costs related to the origination of insurance. These costs are recorded directly in result as incurred, expect for deferred acquisition costs (commissions paid for brokerage services, agency and prospecting efforts), which are recorded proportionally to the recognition of premium revenues, i.e. over the term of the insurance contract.

Insurance Contract Liabilities

Reserves for claims are established based on past experience, claims in process of payment, estimated amounts of claims incurred but not yet reported, and other factors relevant to the required reserve levels.

Liability Adequacy Test

ITAÚ UNIBANCO HOLDING tests liability adequacy by adopting current actuarial assumptions for future cash flows of all insurance contracts in force at the balance sheet date.

Should the analysis show insufficiency, any shortfall identified will be accounted for in income for the period.

The assumptions used to conduct the liability adequacy test are detailed in Note 27.

I) Post-employments benefits

ITAÚ UNIBANCO HOLDING sponsors Defined Benefit Plans and Defined Contribution Plans, which are accounted for in accordance with IAS 19 – Benefits to Employees.

ITAÚ UNIBANCO HOLDING is required to make contributions to government social security and labor indemnity plans, in Brazil and in other countries where it operates.

Pension plans - Defined benefit plans

The liability or asset, as the case may be, is recognized in the Consolidated Balance Sheet with respect to a defined benefit plan corresponds to the present value of defined benefit obligations at the balance sheet date less the fair value of plan assets. The defined benefit obligations is calculated annually by an independent actuarial advisor using the projected unit credit method.

Pension plans - defined contribution

For defined contribution plans, contributions to plans made by ITAÚ UNIBANCO HOLDING, through pension plan funds, are recognized as liabilities, with a counter-entry to expenses, when due. If contributions made exceed the liability for a service provided, it will be accounted for as an asset recognized at fair value, and any adjustments are recognized in Other Comprehensive Income, in the period when they occur.

Other post-employment benefit obligations

Like defined benefit pension plans, these obligations are value annually by independent, qualified actuaries, and costs expected from these benefits are accrued over the period of employment. Gains and losses arising from changes in practices and variations in actuarial assumptions are recognized in Stockholders' equity, under Other comprehensive income, in the period when they occurred.

m) Share-based payments

Share-based payments are booked for the value of equity instruments granted, which may be shares or stock options according to the plan, based on their fair value at the grant date. This cost is recognized during the vesting period.

The total amount to be expensed is determined by reference to the fair value of the equity instruments excluding the impact of any service and non-market performance vesting conditions (in particular when an employee remains with the company for specific period of time).

n) Provisions, contingent assets and contingent liabilities

Contingent assets and liabilities are potential rights and obligations arising from past events for which realization depends on uncertain future events.

Contingent assets are not recognized in the Consolidated Financial Statements, except when the Management of ITAÚ UNIBANCO HOLDING considers that realization is virtually certain. In general this is the case of lawsuits with favorable rulings, in final and unappealable judgments, or the withdrawal of lawsuits as a result of a settlement payment received or an agreement for set-off against an existing liability.

These contingencies are evaluated based on Management's best estimates, and are classified as:

- Probable: liabilities are recognized in the consolidated balance sheet under Provisions;
- Possible: disclosed in the Consolidated Financial Statements, but no provision is recorded;
- **Remote:** require neither a provision nor disclosure.

The amount of court deposits is adjusted in accordance with current legislation.

o) Capital

Common and preferred shares, which for accounting purposes are equivalent to common shares but without voting rights are classified in Stockholders' equity. The additional costs directly attributable to the issue of new shares are included in Stockholders' equity as a deduction from the proceeds, net of taxes.

p) Treasury shares

Common and preferred shares repurchased are recorded in Stockholders' equity under Treasury shares at their average purchase price.

Shares that are subsequently sold, such as those sold to grantees under our share-based payment scheme, are recorded as a reduction in treasury shares, measured at the average price of treasury stock held at that date.

The difference between the sale price and the average price of the treasury shares is recorded as a reduction or increase in Additional paid-in capital. The cancellation of treasury shares is recorded as a reduction in Treasury shares against Appropriated reserves, at the average price of treasury shares at the cancellation date.

q) Dividends and interest on capital

Minimum dividend amounts established in the bylaws are recorded as liabilities at the end of each year. Any other amount above the mandatory minimum dividend is accounted for as a liability when approved by a meeting of the Board of Directors.

Interest on capital is treated for accounting purposes as a dividend, and it is presented as a reduction of stockholders' equity in the consolidated financial statements.

Dividends have been and continue to be calculated and paid on the basis of the financial statements prepared under Brazilian accounting standards and regulations for financial institutions, not these Consolidated financial statements prepared according to the IFRS.

Dividends and interest on capital are presented in Note 19.

r) Earnings per share

ITAÚ UNIBANCO HOLDING grants stock options whose dilutive effect is reflected in diluted earnings per share, with the application of the "treasury stock method". Whereby earnings per share are calculated as if all the stock options had been exercised and the proceeds used to purchase shares of ITAÚ UNIBANCO HOLDING.

Earnings per share are presented in Note 25.

s) Segment information

Segment information disclosed is consistent with the internal reports prepared for the Executive Committee as a basis for its operational decisions.

ITAÚ UNIBANCO HOLDING has three reportable segments: (i) Retail Banking (ii) Wholesale Banking and (iii) Trading + Institutional.

Segment information is presented in Note 30.

t) Revenue from contracts with customers

Revenue from contracts with customers is recognized when ITAÚ UNIBANCO HOLDING provides or offers services to customers, in an amount that reflects the consideration ITAÚ UNIBANCO HOLDING expects to collect in exchange for those services. A five-step model is applied to account for revenues: i) identification of the contract with a customer; ii) identification of the performance obligations in the contract; iii) determination of the transaction price; iv) allocation of the transaction price to the performance obligations in the contract; and v) recognition of revenue when a performance obligation Hs been satisfied.

Note 3 - Business development

Itaú CorpBanca

The Itaú Corpbanca (ITAÚ CORPBANCA) is controlled as of April 1st, 2016 by ITAÚ UNIBANCO HOLDING CONSOLIDATED. On the same date, ITAU UNIBANCO HOLDING entered into a shareholders' agreement with Corp Group, which sets forth, among others, the right of ITAÚ UNIBANCO HOLDING and Corp Group to appoint members for the Board of Directors of ITAÚ CORPBANCA in accordance to their interests in capital stock, and this group of shareholders will have the right to appoint the majority of members of the Board of Directors of ITAÚ CORPBANCA and ITAÚ UNIBANCO HOLDING will be entitled to appoint the majority of members elected by this block.

On October 12, 2018, ITAÚ UNIBANCO HOLDING CONSOLIDATED, through its subsidiary ITB Holding Brasil Participações Ltda., indirectly acquired additional interest of 2.08% (10,651,555,020 shares) in the capital of ITAÚ CORPBANCA, for the amount of R\$ 362.9 then holding 38.14%.

Acquisition of minority interest in XP Investimentos S.A.

On May 11, 2017, ITAÚ UNIBANCO HOLDING, through its subsidiary Itaú Unibanco S.A. (ITAÚ UNIBANCO), entered into an agreement for purchase and sale of shares with XP Controle Participações S.A. (XP CONTROLE), G.A. Brasil IV Fundo de Investimento em Participações, Dyna III Fundo de Investimento em Participações, among other parties (SELLERS), for acquisition of 49.9% of total capital (of which 30.1% of common shares) of XP Investimentos S.A. (XP HOLDING), through capital contribution in the amount of R\$ 600 and acquisition of shares issued by XP HOLDING held by the SELLERS in the amount of R\$ 5,700, and such amounts were restated pursuant to contractual provision, totaling R\$ 6,650 (FIRST ACQUISITION). A portion of this amount was withheld as a guarantee for possible future obligations of XP CONTROLE, for a 10-year period, and possible remaining balance will be paid to XP CONTROLE at the end of this term.

In addition to the FIRST ACQUISITION, the agreement sets forth only one additional acquisition in 2022, subject to future BACEN's approval. Should it be approved, it will enable ITAÚ UNIBANCO to hold up to 62.4% of XP HOLDING's total capital (equivalent to 40.0% of common shares) based on a multiple of result (19 times) of XP HOLDING, therefore being clear that the control over XP Group will remain unchanged, with XP CONTROLE's shareholders. ITAÚ UNIBANCO will act as minority partner.

Effective acquisitions and financial settlements occurred on August 31, 2018, after the satisfaction of certain contractual conditions and obtainment of regulatory and government authorizations required.

Note 4 - Interbank deposits and securities purchased under agreements to resell

		06/30/2019			12/31/2018	
	Current	Non- current	Total	Current	Non-current	Total
Securities purchased under agreements to resell	257,670	319	257,989	280,029	103	280,132

From one to five years	364	372	467	470	

Note 6 - Derivatives

ITAÚ UNIBANCO HOLDING trades in derivative financial instruments with various counterparties to manage its overall exposures and to assist its customers in managing their own exposures.

Futures – Interest rate and foreign currency futures contracts are commitments to buy or sell a financial instrument at a future date, at an agreed price or yield, and may be settled in cash or through delivery. The notional amount represents the face value of the underlying instrument. Commodity futures contracts or financial instruments are commitments to buy or sell commodities (mainly gold, coffee and orange juice) at a future date, at an agreed price, which are settled in cash. The notional amount represents the quantity of such commodities multiplied by the future price on the contract date. Daily cash settlements of price movements are made for all instruments Interest rate and foreign currency futures contracts are commitments to buy or sell a financial instrument at a future date, at a contracted price or yield and may be settled in cash or through delivery. The notional amount represents the face value of the underlying instrument. Commodity futures contracts or financial instruments are commitments to buy or sell commodities (mainly gold, coffee and orange juice), at a future date, at a contracted price, which are settled in cash. The notional amount represents the quantity of such commodities multiplied by the future price at the contract date. Daily cash settlements of price movements are made for all instruments.

Forwards – Interest rate forward contracts are agreements to exchange payments on a specified future date, based on the variation in market interest rates from trade date to contract settlement date. Foreign exchange forward contracts represent agreements to exchange the currency of one country for the currency of another at an agreed price, on an agreed settlement date. Financial instrument forward contracts are commitments to buy or sell a financial instrument on a future date at an agreedInterest forward contracts are agreements to exchange payments on a specified future date, based on a market change in interest rates from trade date to contract settlement date. Foreign exchange forward contracts represent agreements to exchange the currency of one country for the currency of another country at an agreed price, at an agreed settlement date. Financial instrument forward contracts are commitments to buy or sell a financial instrument on a future date at a contracted price and are settled in cash.

Swaps – Interest rate and foreign exchange swap contracts are commitments to settle in cash on a future date or dates the differentials between specific financial indices (either two different interest rates in a single currency or two different rates each in a different currency), as applied to a notional principal amount. Swap contracts shown underat a future date or dates, based on differentials between specified financial indices (either two different interest rates in a single currency or two different rates each in a different currency), as applied to a notional principal amount. Swap contracts presented in Other in the table below correspond substantially to inflation rate swap contracts.

Options – Option contracts give the purchaser, for a fee, the right, but not the obligation, to buy or sell a financial instrument within a limited time, including a flow of interest, foreign currencies, commodities, or financial instruments at an agreed price that may also be settled in cash, based on the within a limited time a financial instrument including a flow of interest, foreign currencies, commodities, or financial instruments at a contracted price that may also be settled in cash, based on differential between specific indices.

Credit Derivatives – Credit derivatives are financial instruments with value deriving from the credit risk on debt issued by a third party (the reference entity), which permits one party (the buyer of the hedge) to transfer the risk to the counterparty (the seller of the hedge). The seller of the hedge must pay out as provided for in the contract if the reference entity undergoes a credit event, such as bankruptcy, default or debt restructuring. The seller of the hedge receives a premium for the hedge but, on the other hand, assumes the risk that the underlying instrument referenced in the contract undergoes a credit event, and the seller may have to make payment to the purchaser of the hedge for up to the notional amount of the credit derivative.

The total value of margins pledged in guarantee by ITAÚ UNIBANCO HOLDING was R\$ 14,881 (R\$ 12,855 at 12/31/2018) and was basically comprised of government securities.

Further information on internal controls and parameters used to management risks, may be accessed in Note 32 – Risk and Capital Management.

IV - Credit derivatives

ITAÚ UNIBANCO HOLDING buys and sells credit protection in order to meet the needs of its customers, management and mitigation of its portfolios' risk.

CDS (credit default swap) is credit derivative in which, upon a default related to the reference entity, the protection buyer is entitled to receive, from the protection seller, the amount equivalent to the difference between the face value of the CDS contract and the fair value of the liability on the date the contract was settled, also known as the recovered amount. The protection buyer does not need to hold the debt instrument of the reference entity for it to receive the amounts due pursuant to the CDS contract terms when a credit event occurs.

TRS (total return swap) is a transaction in which a party swaps the total return of an asset or of a basket of assets for regular cash flows, usually interest and a guarantee against capital loss. In a TRS contract, the parties do not transfer the ownership of the assets.

ITAÚ UNIBANCO HOLDING assesses the risk of a credit derivative based on the credit ratings attributed to the reference entity by independent credit rating agencies. Investment grade entities are those for which credit risk is rated as Baa3 or higher, as rated by Moody's, and BBB- or higher, by Standard & Poor's and Fitch Ratings.

The following table presents the notional amount of credit derivatives purchased. The underlying amounts are identical to those for which ITAÚ UNIBANCO HOLDING has sold credit protection.

		06/30/2019

V - Financial instruments subject to offsetting, enforceable master netting arrangements and similar agreements

The following tables set forth the financial assets and liabilities that are subject to offsetting, enforceable master netting arrangements, and similar agreements, as well as how these financial assets and liabilities have been presented in ITAÚ UNIBANCO HOLDING's consolidated financial statements. These tables also reflect the amounts of collateral pledged or received in relation to financial assets and liabilities subject to enforceable arrangements that have not been presented on a net basis in accordance with IAS 32.

Financial assets subject to offsetting, enforceable master netting arrangements and similar agreements:

		•		•			

		12/31/2018						
	Gross amount of recognized	Gross amount offsetin the Balance	Net amount of financial assets	Related amounts not offse	et in the Balance Sheet ⁽²⁾	Total		
	financial liabilities	Sheet	presented in the Balance Sheet	Financial instruments (3)	Cash collateral pledged	Total		
Securities sold under repurchase agreements	330,237	-	330,237	(23,079)	-	307,158		
Derivatives financil instruments	27,519	-	27,519	(3,091)	(333)	24,095		

⁽¹⁾ Includes amounts of master offset agreements and other such agreements, both enforceable and unenforceable;

Financial assets and financial liabilities are offset in the balance sheet only when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis, or realize the asset and settle the liability simultaneously.

Derivatives and repurchased agreements not set off in the balance sheet relate to transactions in which there are enforceable master netting agreements or similar agreements, but the offset criteria have not been met in accordance with paragraph 42 of IAS 32 mainly because ITAÚ UNIBANCO HOLDING has no intention to settle on a net basis, or realize the asset and settle the liability simultaneously.

⁽²⁾ Limited to amounts subject to enforceable master offset agreements and other such agreements;

⁽³⁾ Includes amounts subject to enforceable master offset agreements and other such agreements, and guarantees in financial instruments.

Note 7 - Hedge accounting

There are three types of hedge relations: Fair value hedge, Cash flow hedge, and Hedge of net investment in foreign operations.

In hedge accounting, the groups of risk factors measured by ITAÚ UNIBANCO HOLDING are:

- Interest Rate: Risk of loss in transactions subject to interest rate variations;
- Currency: Risk of loss in transactions subject to foreign exchange variation.

The structure of risk limits is extended to the risk factor level, where specific limits aim at improving the monitoring and understanding process, as well as avoiding concentration of these risks.

The structures designed for interest rate and exchange rate categories take into account total risk when there are compatible hedging instruments. In certain cases management may decide to hedge a risk for the risk factor term and limit of the hedging instrument.

The other risk factors hedged by the institution are shown in Note 32.

To protect cash flows and fair value of instruments designated as hedged items, ITAÚ UNIBANCO HOLDING uses derivative financial instruments and financial assets. Currently, Futures Contracts, Options, NDF (non-deliverable forwards), Forwards, Swaps and Financial Assets are used.

ITAÚ UNIBANCO HOLDING manages risks through the economic relationship between hedging instruments and hedged items, where the expectation is that these instruments will move in opposite directions and in the same proportion, with the purpose of neutralizing risk factors.

The designated coverage ratio is always 100% of the risk factor eligible for coverage. Sources of ineffectiveness are in general related to the counterparty's credit risk and possible mismatches of terms between the hedging instrument and the hedged item.

a) Cash flow hedge

The cash flow hedge strategies of ITAÚ UNIBANCO HOLDING consist of hedging exposure to variations in cash flows, in interest payment and currency exposure which are attributable to changes in interest rates on recognized and unrecognized assets and liabilities.

ITAÚ UNIBANCO HOLDING applies cash flow hedge strategies as follows:

Interest rate risks

- Hedge of time deposits and repurchase agreements: to hedge fluctuations in cash flows from interest payments resulting from changes in the DI interest rate, through futures contracts;
- Hedge of asset transactions: to hedge fluctuations in cash flows from interest receipts resulting from changes in the DI rate, through futures contracts;
- Hedge of assets denominated in UF*: to hedge fluctuations in cash flows of interest receipts resulting from changes in the UF*, through swap contracts;
- Hedge of Funding: to hedge fluctuations in cash flows of interest payments resulting from changes in the TPM* rate and foreign exchange, through swap contracts;
- Hedge of loan operations: to hedge fluctuations in cash flows of interest receipts resulting from changes in the TPM* rate, through swap contracts;
- Hedge of repurchase agreements: to hedge fluctuactions in cash flows from interest received on changes in Selic (benchmark interest rate), through futures contracts;
- Hedging of expected highly probable transactions: hedging the risk of variation in the amount of the commitments assumed when resulting from variation in the exchange rates.

*UF - Chilean unit of account / TPM - Monetary policy rate

ITAÚ UNIBANCO HOLDING does not use the qualitative method to evaluate the effectiveness or to measure the ineffectiveness of such strategies.

For cash flow hedge strategies, ITAÚ UNIBANCO HOLDING uses the hypothetical derivative method. This method is based on a comparison of the change in the fair value of a hypothetical derivative with terms identical to the critical terms of the variable-rate liability, and this change in the fair value is considered a proxy of the present value of the cumulative change in the future cash flow expected for the hedged liability.

For strategies of deposits and repurchase agreements to resell, asset transactions and asset-backed securities under repurchase agreements, the entity frequently reestablishes the coverage relationship, since both the hedged item and instruments change over time. This is so because they are portfolio strategies, reflecting guidelines for risk management strategy approved in the proper approval level.

The amount of R\$ (1,327) in Reserve of Cash Flow Hedge will be recognized in result for the maturity term of the hedged item. In the period ended June 30, 2019, the amount of R\$ (374) was recognized in Result related to this deferral.

For strategies of deposits and repurchase agreements to resell, asset transactions and asset-backed securities under repurchase agreements, the entity frequently reestablishes the coverage relationship, since both the hedged item and instruments change over time. This is so because they are portfolio strategies, reflecting guidelines for risk management strategy approved in the proper approval level.

b) Hedge of net investment in foreign operations

ITAÚ UNIBANCO HOLDING's strategies of for net investments in foreign operations consist of a hedge ofhedging the exposure in foreign currency arising from the functional currency of the foreign operation, with respect to against the functional currency of the head office, by contracting DDI futures,, DDI, NDF and financial assets.

The risk hedged in this type of strategy is the foreign exchangecurrency risk.

ITAÚ UNIBANCO HOLDING does not use the qualitative method to assess evaluate the effectiveness and or to measure the ineffectiveness of these strategies.

To evaluate the effectiveness and to measure the ineffectiveness of such strategiesInstead, ITAÚ UNIBANCO HOLDING uses the Dollar Offset Method. The Dollar Offset Method, which is based on a comparison of the change in fair value (cash flow) of the hedge instrhedging instrument, attributable to changes in the exchange rate and the gain (loss) arising from the variations in exchange rates, on the amount of investment abroad designated as a the object of the hedged item.

c) Fair value hedge

The fair value hedge hedging strategy of ITAÚ UNIBANCO HOLDING consists in of hedging the exposure to variations in fair value, in on the receipt and payment of interest related toon recognized assets and liabilities.

ITAÚ UNIBANCO HOLDING has applied applies fair value hedge ashedges as follows:

Interest rate risk

• To protect the risk of variation in the fair value of receipt and payment of interest resulting from variations in the fair value of the variable rates involved, by contracting swaps and futures.

I ITAÚ UNIBANCO HOLDING does not use the qualitative method to assess evaluate the effectiveness and or to measure the ineffectiveness of these strategies.

To evaluate the effectiveness and to measure the ineffectiveness of such strategyInstead, ITAÚ UNIBANCO HOLDING uses the percentage approach and dollar offset method:

- The percentage approach is based on the calculation of change in the fair value of the reviewed revised
 estimate for the hedged position (hedged item) attributable to the protected risk versus the change in
 the fair value of the hedged derivative hedging instrument.
- The dollar offset method is calculated based on the difference between the variation of in the fair value of the hedging instrument and the variation in the fair value of the hedged item attributed to changes in the interest rate.

The effects of hedge accounting on the financial position and performance of ITAÚ UNIBANCO HOLDING are presented below:

		06/30/2019

Note 10 - Loan operations and lease operations portfolio

a) Composition of loans and lease operations

Below is the composition of the carrying amount of loan operations and lease operations by type, sector of debtor, maturity and concentration:

Loans and financial lease by type	06/30/2019	12/31/2018
Individuals	223,661	212,564
Credit card	80,100	78,255
Personal loan	33,223	29,543
Payroll loans	49,313	46,878
Vehicles	17,205	15,920
Mortgage loans	43,820	41,968
Corporate	102,520	102,643
Micro/Small and medium companies	75,582	68,812
Foreign loans - Latin America	154,595	152,072
Total Loans and financial lease operations (1)	556,358	536,091
Provision for Expected Loss (2)	(32,851)	(33,509)
Total loan operations and lease operations, net of allowance for Expected Credit Loss	523,507	502,582

⁽¹⁾ In the composition of balance there are operations designated at Fair Value Through Profit or Loss, in the amount of R\$ 460 at 06/30/2019.

⁽²⁾ Comprises Provision for Expected Credit Loss for Financial Guarantees Pledged R\$ (1,108) (R\$ (1,191) at 12/31/2018) and Commitments to be Released R\$ (2,975) (R\$ (2,601) at 12/31/2018).

By maturity	06/30/2019	12/31/2018
Overdue as from 1 day	20,816	19,563
Falling due up to 3 months	151,918	144,812
Falling due from 3 months to 12 months	140,274	127,805
Falling due after 1 year	243,350	243,911
Total loan operations and lease operations	556,358	536,091

By concentration	06/30/2019	12/31/2018
Largest debtor	5,244	5,193
10 largest debtors	28,982	31,564
20 largest debtors	43,915	47,433
50 largest debtors	70,664	73,358
100 largest debtors	95,878	98,675

The breakdown of the loans and financial lease portfolio by debtor's industry is described in Note 32, item 1.4.1 - By business sector.

b) Gross Carrying Amount (Loan Portfolio)

Reconciliation of gross portfolio of Loans and Financial Lease, segregated by stages:

Stage 1	balance at 12/31/2018	Transfer to Stage 2	Transfer to Stage 3 ^(*)	Cure from the Stage 2	Cure from the Stage 3	Derecognition	Acquisition / (Settlement)	Closing balance at 06/30/2019

⁽¹⁾ In the movement of transfer of operations from phase 1 to phase 3 over the period, a representative part thereof have first gone through phase 2;

d) Lease operations - Lessor

Financial leases are composed of vehicles, machines, equipment and real estate in Brazil and abroad. The analysis of portfolio maturities is presented below:

		06/30/2019	
	Payments	Future financial	Present
	receivable	income	value
Current	1,539	(408)	1,131
Up to 1 year	1,539	(408)	1,131
Non-current	9,122	(2,692)	6,430
From 1 to 2 years	1,195	(452)	743
From 2 to 3 years	918	(379)	539
From 3 to 4 years	721	(318)	403
From 4 to 5 years	784	(298)	486
Over 5 years	5,504	(1,245)	4,259
Total	10,661	(3,100)	7,561

Financial lease revenues are composed of:

	01/01 to 06/30/2019
Financial Income	305
Variable payments	17
Total	322

F.52

⁽²⁾ Comprises Expected Loan Losses for Financial Guarantees Pledged R\$ (1,191) (R\$ (1,907) at 12/31/2017) and Commitments to be Released R\$ (2,601) (R\$ (3,015) at 12/31/2017).

e) Operations of securitization or transfers and acquisition of financial assets

ITAÚ UNIBANCO HOLDING carried out operations of securitization or transfer of financial assets in which there was retention of credit risks of financial assets transferred under co-obligation covenants. Thus, these credits are still recorded in the Consolidated Balance Sheet and are represented as follows:

		06/30/2019				12/31/2018			
Nature of operation	As	Assets		abilities ^(*)		sets	Liabilities ^(*)		
	Book value	Fair value	Book value	Fair value	Book value	Fair value	Book value	Fair value	
Mortgage loan	1,703	1,741	1,696	1,731	1,941	1,925	1,939	1,920	
Working capital	1,790	1,790	1,755	1,755	2,140	2,140	2,128	2,128	
Other			3	3	-	-	4	4	
Total	3,493	3,531	3,454	3,489	4,081	4,065	4,071	4,052	

^(*) Under Interbank Market Debt.

From January 1 to June 30, 2019, there were no transactions for transfer of financial assets without retention of risks and benefits. The effect from January 1 to June 30, 2018 was R\$ 53, net of Provision for Expected Loss (R\$ 12 de 01/01 a 06/30/2018).

Note 11 - Investments in associates and joint ventures

a) The following table presents non-material individual investments of ITAÚ UNIBANCO HOLDING:

		06/30/2019			
	Investment	Equity in earnings	Other comprehensive income	Total comprehensive Income	
Associates (a)	12,104	633	3	636	
Joint ventures (b)	214	(56)	-	(56)	
Total	12,318	577	3	580

Note 19 - Stockholders' equity

a) Capital

Capital is represented by 9,804,135,348 book-entry shares with no par value, of which 4,958,290,359 are common shares and 4,845,844,989 are preferred shares with no voting rights, but with tag-along rights, in the event of transfer of control, for inclusion in a public offering of shares, assuring them of a price equal to eighty per cent (80%) of the amount paid per voting share in the controlling block, and a dividend at least equal to that of the common shares.

Meetings of the Board of Directors held on 02/22/2018, approved the cancellation of 14,424,206 of common shares of own issue and held in treasury, with no change in capital, by capitalizing amounts recorded in Revenue Reserves – Statutory Reserve.

The Extraordinary Stockholders' Meeting (EGM) held on July 27, 2018 approved a 50% split in the Company's capital and the process was approved by BACEN on October 31, 2018. The new shares were included in the share position on November 26, 2018. Thus, for easier comparability, the number of shares shown in this item are post-split.

A breakdown and changes in paid-in capital at the beginning and end of the period are shown below:

		06/30/20)19	
		Number		Amount

Average cost	-	21.76			
Market value at 12/31/2018	30.05	35.50			

b) Dividends

Shareholders are entitled to a mandatory minimum dividend in each fiscal year, corresponding to 25% of adjusted net income, as set forth in the Bylaws. Common and preferred shares participate equally in income distributed, after common shares have received dividends equal to the minimum annual priority dividend payable to preferred shares (R\$ 0.022 non-cumulative per share).

The calculation of the monthly advance of the mandatory minimum dividend is based on the share position on the last day of the preceding month, and payment is made on the first business day of the subsequent month, amounting to R\$ 0.015 per share.

I - Calculation of dividends and interest on capital

	06/30/2019	06/30/2018
Statutory net income	13,505	9,946
Adjustments:

Total from 01/01 to 06/30/2018		5,435	(122)	5,313

c) Capital reserves and profit reserves

I - Additional paid-in capital

Additional paid-in capital corresponds to: (i) the difference between the sale price of treasury shares and the average cost of such shares, and (ii) the yield expenses recognized in accordance with the stock option plan and variable compensation.

II - Appropriated reserves

	06/30/2019	12/31/2018
Capital reserves	285	285
Premium on subscription of shares	284	284
Reserves from tax incentives, restatement of equity securities and other	1	1

Other	120	119	29	18
Total	13,899	13,684	319	322

⁽²⁾ Its main purpose is to ensure the yield flow to shareholders.

⁽³⁾ Refers to Dividends or Interest on Capital declared after 06/30/2019 and 12/31/2018.

Note 20 - Share-based payment

ITAÚ UNIBANCO HOLDING and its subsidiaries have share-based payment plans aimed at involving management and employees in the medium and long term corporate development process.

The grant of these benefits is only made in years in which there are sufficient profits to permit the distribution of mandatory dividends, limiting dilution to 0.5% of the total shares held by the controlling and minority stockholders at the balance sheet date. These programs are settled through the delivery of ITUB4 treasury shares to stockholders.

Expenses on stock-based payment plans are presented in the table below:

	04/01 to	04/01 to	01/01 to	01/01 to
	06/30/2019	06/30/2018	06/30/2019	06/30/2018
Partner Plan	(50)	(73)	(146)	(108)
Variable compensation plan	(106)	(89)	(217)	(206)
Total	(156)	(162)	(363)	(314)

I - Partner Plan

The program enables employees and managers of ITAÚ UNIBANCO HOLDING to invest a percentage of their bonus to acquire shares and share-based instruments. There is a lockup period of from three to five years, counted from the initial investment date, and the shares are thus subject to market price variations. After complying with the preconditions outlined in the program, beneficiaries are entitled to receive shares as consideration, in accordance with the number of shares indicated in the regulations.

The acquisition price of shares and share-based Instruments is established every six months as the average of the share price over the last 30 days, which is performed on the seventh business day prior to the remuneration grant date.

The fair value of the consideration in shares is the market price at the grant date, less expected dividends.

Changes in the Partner Program

	01/01 to 06/30/2019	01/01 to 06/30/2018
	Quantity	Quantity
Opening balance	48,871,182	51,074,441
New grants	8,096,700	9,912,356
Exercised	(15,627,167)	(11,597,420)
Cancelled	(865,922)	(465,365)
Closing balance	40,474,793	48,924,012
Weighted average of remaining contractual life (years)	2.11	2.74
Market value weighted average (R\$)	25.49	26.22

II- Variable compensation

In this plan, 50% of variable compensation of managers is paid in cash and fifty percent (50%) is paid in shares for a period of three years. Shares are delivered on a deferred basis, of which one-third (1/3) per year, will be contingent upon the executive's permancence in the institution. The deferred unpaid portions may be reversed proportionally to a significant reduction in the recurring income realized or the negative income for the period.

Management members become eligible for the receipt of these benefits according to individual performance, business performance or both. The benefit amount is established according to the activities of each management member who should meet at least the performance and conduct requirements.

The fair value of the share is the market price at its grant date.

Change in share-based variable compensation

	01/01 to 06/30/2019	01/01 to 06/30/2018
	Quantity	Quantity
Opening balance	25,016,145	31,229,973
New	9,791,483	10,240,672
Delivered	(14,236,717)	(16,611,521)
Cancelled	(57,273)	(125,060)
Closing balance	20,513,638	24,734,064
Market value weighted average (R\$)	37.55	34.05

III - Stock Option Plan (Simple Options)

ITAÚ UNIBANCO HOLDING has a Stock Option Plan ("Simple Options"), which has been discontinued, and only vested options remain.

Simple options have the following characteristics:

- a) Exercise price: calculated as the average prices of shares in the three months of the year prior to the grant date. The prices determined are inflation-adjusted to the last business day of the month prior to the option exercise date in line with the IGP-M inflation index or, in its absence, an index to be determined internally, and must be paid according to the regulations for the settlement of trading on B3.
- **b) Vesting period:** determined upon issue, from one to seven years, counted from the grant date. The vesting period is normally five years.

Summary of changes in the Simple options plan

	01/01 to	06/30/2019	01/01 to	06/30/2018
	Quantity	Weighted average exercise price	Quantity	Weighted average exercise price

Note 24 - Taxes

ITAÚ UNIBANCO HOLDING and each one of its subsidiaries calculate separately, in each fiscal year, Income Tax and Social Contribution on Net Income.

Taxes are calculated at the rates shown below and consider, for effects of respective calculation bases, the legislation in force applicable to each charge.

Income tax	15.00%
Additional income tax	10.00%
Social contribution on net income (*)	15.00%

^(*) For non-financial subsidiaries the Social Contribution tax rate is 9.00%.

a) Expenses for taxes and contributions

Breakdown of income tax and social contribution expense calculation:

Due on operations for the period	04/01 to 06/30/2019	04/01 to 06/30/2018	01/01 to 06/30/2019	01/01 to 06/30/2018
Income before income tax and social contribution	9,591	2,375	19,129	11,938
Charges (income tax and social contribution) at the rates in effect	(3,836)	(1,069)	(7,652)	(5,372)
Increase / decrease in income tax and social contribution charges arising from:				
Share of profit or (loss) of associates and joint ventures net	107	(28)	166	29
Foreign exchange variation on investiments abroad	(219)	4,089	(291)	4,225
Interest on capital	736	886	1,598	1,818
Corporate reorganizations (Note 2.4 a IV)	-	157	-	314
Dividends and interest on external debt bonds	139	194	226	262
Other nondeductible expenses net of non taxable income (*)	645	(6,917)	1,856	(5,543)
Income tax and social contribution expenses	(2,428)	(2,688)	(4,097)	(4,267)
Related to temporary differences				
Increase (reversal) for the period	(467)	5,448	(1,439)	3,787
Increase (reversal) of prior periods	(6)	759	-	993
(Expenses) / Income related to deferred taxes	(473)	6,207	(1,439)	4,780
Total income tax and social contribution expenses	(2,901)	3,519	(5,536)	513

^(*) Includes temporary (additions) and exclusions.

I - The deferred tax asset balance and its changes, segregated based on its origin and disbursements, are represented by:

	12/31/2018	Realization / Reversal	Increase	06/30/2019
Reflected in income	37,252	(9,257)	8,490	36,485

^(*) Deferred income tax and social contribution asset and liabilities are recorded in the balance sheet offset by a taxable entity and amounting to R\$ 32,781 and R\$ 447, respectively.

III - The estimate of realization and present value of tax credits and from the Provision for Deferred Income Tax and Social Contribution are:

Deferred tax assets										
Year of realization	Temporary differences	%	Tax loss / social contribution loss carryforwards	%	Total	%	Deferred tax liabilities	%	Net deferred taxes	%
2019	5,842	17%	2,320	46%	8,162	21%	(969)	12%	7,193	24%
2020	12,666	38%	850	17%	13,516	35%	(957)	12%	12,559	41%
2021	7,886	23%	108	2%	7,994	20%	(496)	6%	7,498	24%
2022	691	2%	188	4%	879	2%	(1,319)	17%	(440)	-1%
2023	531	2%	98	2%	629	2%	(266)	3%	363	1%
After 2023	6,112	18%	1,473	29%	7,585	20%	(4,061)	50%	3,524	11%
Total	33,728	100%	5,037	100%	38,765	100%	(8,068)	100%	30,697	100%
Present value (*)	31,259		4,649		35,908		(7,047)		28,861	

^(*) The average funding rate, net of tax effects, was used to determine the present value.

Projections of future taxable income include estimates of macroeconomic variables, exchange rates, interest rates, volumes of financial operations and services fees and others factors, which can vary in relation to actual data and amounts.

Net income in the financial statements is not directly related to the taxable income, due to differences between accounting criteria and the tax legislation, in addition to corporate aspects. Accordingly, it is recommended that changes in realization of deferred tax assets presented below are not considered as an indication of future net income.

IV - At June 30, 2018, temporary effects brought by Law nº. 13,169/15 were considered, which increased the social contribution tax rate from 15% to 20% until December 31, 2018, and tax credits were recognized based on their likelihood of realization. On 06/30/2019 and 12/31/2018, there are no unrecognized tax credits.

c) Tax liabilities

	06/30/2019	12/31/2018
Taxes and contributions on income payable	1,345	615
Other Taxes and Contributions payable	1,170	1,443
Provision for deferred income tax and social contribution (Note 24b II)	321	447
Others	2,235	2,779
Total	5,071	5,284

Note 25 - Earnings per share

a) Basic earning per share

Net income attributable to ITAÚ UNIBANCO HOLDING's shareholders is divided by the average number of outstanding shares in the period, excluding treasury shares.

	04/01 to 06/30/2019	04/01 to 06/30/2018	01/01 to 06/30/2019	01/01 to 06/30/2018
Net income attributable to owners of the parent company	6,527	5,740	13,274	12,129
Minimum non-cumulative dividends on preferred shares	(105)	(105)	(105)	(105)
Retained earnings to be distributed to common equity owners in an amount per	(100)	(100)	(100)	(100)
share equal to the minimum dividend payable to preferred equity owners	(109)	(109)	(109)	(109)
Retained earnings to be distributed, on a pro-rata basis, to common and	(:)	(100)	(133)	(155)
preferred equity owners:				
Common	3,213	2,817	6,651	6,078
Preferred	3,100	2,709	6,409	5,837
Total net income available to equity owners:				
Common	3,322	2,926	6,760	6,187
Preferred	3,205	2,814	6,514	5,942
Weighted average number of shares outstanding				
Common	4,958,290,359	4,958,290,359	4,958,290,359	4,958,290,359
Preferred	4,784,855,172	4,767,644,902	4,777,575,546	4,761,867,731
Earnings per share - Basic - R\$				
Common	0.67	0.59	1.36	1.25
Preferred	0.67	0.59	1.36	1.25

b) Diluted earnings per share

Calculated similarly to the basic earnings per share; however, it includes the conversion of all preferred shares potentially dilutable in the denominator.

	04/01 to 06/30/2019	04/01 to 06/30/2018	01/01 to 06/30/2019	01/01 to 06/30/2018
Net income available to preferred equity owners	3,205	2,814	6,514	5,942
Dividends on preferred shares after dilution effects	21	21	27	30
Net income available to preferred equity owners considering preferred shares after the dilution effect	3,226	2,835	6,541	5,972
Net income available to ordinary equity owners	3,322	2,926	6,760	6,187
Dividend on preferred shares after dilution effects	(21)	(21)	(27)	(30)
Net income available to ordinary equity owners considering preferred shares after the dilution effect	3,301	2,905	6,733	6,157
Adjusted weighted average of shares				
Common	4,958,290,359	4,958,290,359	4,958,290,359	4,958,290,359
Preferred	4,846,370,585	4,838,802,999	4,816,454,169	4,809,513,789
Preferred	4,784,855,172	4,767,644,902	4,777,575,546	4,761,867,731
Incremental as per share-based payment plans	61,515,413	71,158,097	38,878,623	47,646,058
Diluted earnings per share – R\$				
Common	0.67	0.59	1.36	1.24
Preferred	0.67	0.59	1.36	1.24

There was not potentially antidulitive effect of the shares in Stock Based Payment Plans in both periods and, for better comparability, shares at June 30, 2018 were adjusted by the split approved on October 31, 2018.

Note 26 - Post-employment benefits

ITAÚ UNIBANCO HOLDING, through its subsidiaries, sponsors retirement plans for its employees.

Retirement plans are managed by Closed-end Private Pension Entities (EFPC) and are closed to new applicants. These entities have an independent structure and manage their plans in accordance with their regulations.

There are three types of retirement plan:

- Defined Benefit Plans (BD): plans under which scheduled benefits are for predefined amounts, based on salaries and/or length of service of employees, and the cost is actuarially determined;
- Defined Contribution Plans (CD): plans under which scheduled benefits are at all times adjustes to the balance of the investments made in the name of the participant, including in the benefit concession phase, taking into account net proceeds, amounts contributes and benefits paid; and
- Variable Contribution Plans (CV): in this type of plan, scheduled benefits combine the characteristics of defined contribution and defined benefit plans, and the benefit is actuarially determined based on the investment accumulated by the participant on the eligibility date.

Below is a list of benefit plans and their modalities:

Entity	Benefit plan	Modality
	Supplementary retirement plan	
	Supplementary Retirement Plan – Flexible Premium Annuity	
	Franprev benefit plan – PBF	
	002 benefit plan - PB002	
	Prebeg benefit plan	
	UBB PREV defined benefit plan	Defined Benefit
	Benefit Plan II	
	Itaulam basic plan	
taú Unibanco Foundation –	Itaú Defined Benefit Plan	
Suplementary Pension - FIU	REDECARD Retirement Plan	
,	ITAUCARD Defined Benefit Retirement Plan	
	Itaubanco Defined Contribution Plan	
	Itaubank Retirement Plan	Defined Contribution
	REDECARD Pension Plan	
	Unibanco Pension Plan	
	Itaulam Supplementary Plan	
	Itaú Defined Contribution Plan	Variable Contribution
	REDECARD Supplementary Retirement Plan	
	ITAUCARD Supplementary Retirement Plan	
TINDED Multipropagad Dension E	Funbep I Benefit Plan	Defined Benefit
FUNBEP Multisponsored Pension F	Funbep II Benefit Plan	Variable Contribution

Defined Contribution plans include pension funds consisting of the portions of sponsor's contributions not included in a participant's account balance due to loss of eligibility for the benefit, and of monies arising from the migration of retirement plans in defined benefit modality. These funds are used for future contributions to individual participants' accounts, according to the respective benefit plan regulations.

a) Main Actuarial Assumptions

Actuarial assumptions of demographic and financial nature should reflect the best estimates about the variables that determine the post-employment benefit obligations.

The main demographic assumptions comprise: mortality table and turnover of active participants, while the main financial assumptions include: discount rate, future salary increases, growth of plan benefits and inflation.

	06/30/2019	06/30/2018
Discount rate (1)	9.72% p.a.	9.98% p.a.
Mortality table (2)	AT-2000	AT-2000
Turnover	Itaú Experience 2008/2010 (3)	Itaú Experience 2008/2010
Future salary growth	4.00% to 7.12 % p.a.	5.04% to 7.12 % p.a.
Growth of the pension fund benefits	4.00 % p.a.	4.00 % p.a.
Inflation	4.00 % p.a.	4.00 % p.a.
Actuarial method	Projected Unit Credit	Projected Unit Credit

⁽¹⁾ Determined based on market yield relating to National Treasury Notes (NTN-B) and compatible with the economic scenario observed on the balance sheet closing date, considering the volatility of interest market and models used.

Retired plans sponsored by foreign subsidiaries - Banco Itaú (Suisse) S.A., Itaú CorpBanca Colombia S.A. and PROSERV - Promociones y Servicios S.A. de C.V. - are structured as Defined Benefit modality and adopt actual assumptions adequate to masses of participants and the economic scenario of each country.

b) Risk Management

The EFPCs sponsored by ITAÚ UNIBANCO HOLDING are regulated by the National Council for Complementary Pension (CNPC) and PREVIC, has an Executive Board, Advisory and Tax Councils.

Benefits offered have long-tem characteristics and the main factors involved in the management and measurement of their risks are financial risk, inflation risk and biometric risk.

- Financial Risk the actuarial liability is calculated by adopting a discount rate different from rates earned in investments. If real income from plan investments is lower than yield expected, this may give rise to a deficit. To mitigate this risk and assure the capacity to pay long-term benefits, the plans have a significant percentage of fixed-income securities pegged to the plan commitments, aiming at minimizing volatility and risk of mismatch between assets and liabilities.
- Inflation risk a large part of liabilities is pegged to inflation risk, making actuarial liabilities sensitive to increase in rates. To mitigate this risk, the same financial risks mitigation strategies are used.
- Demographic Risk plans that have any obligation actuarially assessed are exposed to biometric risk. In the event the mortality tables used are not adherent to the mass of plan participants, a deficit or surplus may arise in actuarial evaluation. To mitigate this risk, adherence tests to biometric assumptions are conducted to ensure their adequacy to liabilities of respective plans.

For purposes of registering in the balance sheet the EFPCs that manage them, actuarial liabilities of plans use discount rate adherent to its asset portfolio and income and expense flows, according to a study preparedby an independent consulting company. The actuarial method used is the aggregate method, through which the plan costing Is defined by the difference between its equity coverage and the current value of its future liabilities. Observing the methodology established in the respective actuarial technical note. In the event deficit is verified in the concession period above the settlement limits set forth by the legislation in force, a debt agreement is entered into with the sponsor with financial guarantees.

⁽²⁾ Correspond to those disclosed by SOA – "Society of Actuaries", that reflect a 10% increase in the probabilities of survival regarding the respective basic tables.

⁽³⁾ Updated to the new expectation of mass behavior.

c) Asset management

The purpose of the management of the funds is the long-term balance between pension assets and liabilities with payment of benefits by exceeding actuarial goals (discount rate plus benefit adjustment index, established in the plan regulations).

Below is a table with the allocation of assets by category, segmented into Quoted in an Active Market and Not Quoted in an Active Market:

T	Fair	value	% Allocation		
Types	06/30/2019	12/31/2018	06/30/2019	12/31/2018	
Fixed income securities	17,496	18,065	90.82%	96.05%	
Quoted in an active market	17,203	17,775	89.30%	94.51%	
Non quoted in an active market	293	290	1.52%	1.54%	
Variable income securities	1,056	24	5.48%	0.13%	
Quoted in an active market	1,048	18	5.44%	0.09%	
Non quoted in an active market	8	6	0.04%	0.04%	
Structured investments	84	59	0.44%	0.31%	
Quoted in an active market	9	1	0.05%	0.01%	
Non quoted in an active market	75	58	0.39%	0.30%	
Real estate	547	578	2.84%	3.07%	
Loans to participants	81	82	0.42%	0.44%	
Total	19,264	18,808	100.00%	100.00%	

The defined benefit plan assets include shares of ITAÚ UNIBANCO HOLDING, its main parent company (ITAÚSA) and of subsidiaries of the latter, with a fair value of R\$ 11 (R\$ 11 at 12/31/2018), and real estate rented to Group companies, with a fair value of R\$ 458 (R\$ 487 at 12/31/2018).

d) Other post-employment benefits

ITAÚ UNIBANCO HOLDING and its subsidiaries do not have additional liabilities related to post-employment benefits, except in cases arising from maintenance commitments assumed in acquisition agreements occurred over the years, as well as those benefits originated from court decision in the terms and conditions established, in which there is total or partial sponsorship of health care plan for a specific mass of former employees and their beneficiaries. Its costing is actuarially determined so as to ensure coverage maintenance. These plans are closed to new applicants.

Assumptions for discount rate, inflation, mortality table and actuarial method are the same used for retirement plans. In the last 3 years, ITAÚ UNIBANCO HOLDING used the percentage of 8.16% p.a. for medical inflation and the percentage of 3% p.a. for aging factor.

Particularly in other post-employment benefits, there is medical inflation risk associated to increase in medical costs above expectation. To mitigate this risk, the same financial risks mitigation strategies are used.

e) Net amount recognized in the balance sheet

		06/30/2019

^(*) Average duration of plan's actuarial liabilities.

i) Sensitivity analysis

To measure the effects of changes in the key assumptions, sensitivity tests were conducted in actuarial liabilities. The sensitivity analysis considers a vision of the impacts caused by changes in assumptions, which could affect the income for the period and stockholders' equity at the balance sheet date. This type of analysis is usually carried out under the *ceteris* paribus condition, in which the sensitivity of a system is measured when only one variable of interest is changed and all the others remain unchanged. The results obtained are shown in the table below:

	BD an	d CV retireme	nt plans	Other post-employment benefits

Note 27 - Insurance contracts and private pension

ITAÚ UNIBANCO HOLDING, through its subsidiaries, offers to the market insurance and private pension products, with the purpose of assuming risks and restoring the economic balance of the insured's assets. Products are offered through insurance brokers (independent and captive brokers), Itaú Unibanco's electronic channels and branches, in compliance with the regulatory requirements, of the National Council of Private Insurance – CNSP and the Superintendence of Private Insurance - SUSEP.

I - Insurance

A contract entered into by the parties to protect the customer's assetes, upon payment of a premium, by means of replacement or pre-established financial compensation, against damage their property or their person. As backing, ITAÚ UNIBANCO HOLDING insurance companies set up technical reserves, through specialized areas within the conglomerate, with the objective of indemnifying policyholders' losses in the event of claims of insured risks.

The insurance risks sold by ITAÚ UNIBANCO HOLDING's insurance companies are divided into property and casualty, covering loss, damage or liabilities for assets or persons, and life insurance that includes coverage for death and personal accidents.

II - Private pension

Designed to ensure the maintenance of the quality of life of participants, as a supplement to the government plans, through long term investments, private pension products are divided into three major groups:

- PGBL Free Benefit Generating Plan: The main objective of this plan is the accumulation of financial resources, but it can be purchased with additional risk coverage. Recommended for customers that file the full version of the income tax return, because they can deduct contributions paid for tax purposes up to 12% of their annual taxable gross income.
- VGBL Free Benefit Generating Life Plan: This is insurance structured as a pension plan. Its taxation differs from the PGBL; in this case, the tax basis is the earned income.
- FGB Benefit Generator Fund: This is a pension plan with minimum income guarantee, and possibility of receiving earnings from asset performance. Although there are plans still in existence, they are no longer sold.

III - Technical reserves for insurance and private pensions

The technical provisions for insurance and private pensions are recognized according to the technical notes approved by SUSEP and criteria established by current legislation, as follows:

- Provision for unearned premiums (PPNG) this provision is recognized, based on insurance
 premiums, to cover amounts payable for future claims and expenses. In the calculation, the term to
 maturity of risks assumed and issued and risks in effect but not issued (PPNG-RVNE) in the policies or
 endorsements of contracts in force is taken pro rata on a daily basis;
- Provision for unsettled claims (PSL) this provision is recognized to cover expected amounts to
 reported and unpaid claims, including administrative and judicial claims. It includes amounts related to
 indemnities, reserve funds and past-due income, all gross of reinsurance operations and net of
 coinsurance operations. When necessary, it must cover adjustments for IBNER (claims incurred but not
 sufficiently reported) for the total of claims reported but not yet paid, a total which may change during the
 process up to final settlement;

- Provision for claims incurred and not reported (IBNR) this provision is recognized for the coverage
 of expected amount for settlement of claims incurred but not reported up to the calculation base date,
 including administrative and judicial claims. It includes amounts related to indemnities, reserve funds and
 income, all gross of reinsurance operations and net of coinsurance operations;
- Mathematical provisions for benefits to be granted (PMBAC) recognized for the coverage of
 commitments assumed to participants or policyholders, based on the provisions of the contract, while the
 event that gives rise to the benefit and/or indemnity has not occurred;
- Mathematical provisions for benefits granted (PMBC) recognized for the coverage of commitments
 to payment of indemnities and/or benefits to participants or insured parties, based on the provisions of
 the contract, after the event has occurred.
- Provision for financial surplus (PEF) it is recognized to guarantee amounts intended for the
 distribution of financial surplus, if provided for in the contract. Corresponds to the financial income
 exceeding the minimum return guaranteed in the product;
- Supplemental Coverage Reserve (PCC) recognized when technical reserves are found to be insufficient, as shown by the Liability Adequacy Test, provided for in the regulations;
- Provision for redemptions and other amounts to be regularized (PVR) this provision is recognized
 for the coverage of amounts related to redemptions to be regularized, returned premiums or funds,
 transfers requested but, for any reason, not yet transferred to the recipient insurance company or open
 private pension entity, and where premiums have been received but not quoted;
- Provision for related expenses (PDR) recognized for the coverage of expected amounts related to expenses on benefits and indemnities, due to events which have occurred or will occur.

(+/-) Others (increase / reversal)	(13)	47	34	(207)	(886)	(1,093)
Closing balance	4,198	205,489	209,687	3,809	197,378	201,187

Through actuarial models based mainly on the portfolio historical experience and on macroeconomic projections, ITAÚ UNIBANCO HOLDING establishes the assumptions that influence the assessment of technical provisions. The assumptions are reassessed annually by experts of the actuarial and risk area, and are subsequently submitted to the executive's approval. The effects on assumptions are recognized in income for the period in which they occurred.

V - Deferred acquisition costs

They are recorded in assets and charges are shown in the table below:

	06/30/2019	12/31/2018
Opening Balance	409	253
Increase	578	1,001
Amortization	(518)	(845)
Closing Balance	469	409
Balance to be amortized in up to 12 months	374	334
Balance to be amortized after 12 months	95	75

VI - Table of Claims Development

The amounts shown in the tables express the position at 06/30/2019, since the actuarial calculations are made on a half-yearly basis:

Provision for unsettled claims (PSL)	565
(-) IBNER	166
(-) Reinsurance	36
(-) Retrocession and other estimates	(20)
Liability claims presented in the claims development table (a + b)	383

(*) Stated in Note 27IV c at 12/31/2018.

The amount of obligations of the ITAÚ UNIBANCO HOLDING may change at the end of each annual reporting period. The table below shows the development by the claims incurred method. The first part of the table shows how the final loss estimate changes through time. The second part of the table reconciles the amounts pending payment and the liability disclosed in the balance sheet.

a) Administratives claims

Occurrence date	06/30/2015	06/30/2016	06/30/2017	06/30/2018	06/30/2019	Total
At the end of reporting period	898	950	872	866	1,080	
After 1 year	955	1,005	937	992		
After 2 years	985	1,024	984			
After 3 years	998	1,120				
After 4 years	1,033					
Current estimate	1,033	1,120	984	992	1,080	
Accumulated payments through base date	1,028	1,106	963	976	927	5,000
Liabilities recognized in the balance sheet	5	15	21	16	153	210
Liabilities in relation to prior periods						15
Total administratives claims						225

b) Judicial claims

Occurrence date	06/30/2015	06/30/2016	06/30/2017	06/30/2018	06/30/2019	Total
At the end of reporting period	28	32	24	14	21	
After 1 year	41	47	30	34		
After 2 years	53	52	55			
After 3 years	60	58				
After 4 years	66					
Current estimate	66	58	55	34	21	
Accumulated payments through base date	50	46	44	26	14	180
Liabilities recognized in the balance sheet	15	11	11	8	7	52
Liabilities in relation to prior periods						106
Total judicial claims						158

The breakdown of the claims development table into administrative and judicial shows the reallocation of administrative claims up to a certain base date and that become judicial claims afterwards, which may give the wrong impression of need for adjusting the provisions in each breakdown.

VII - Liability Adequacy Test

ITAÚ UNIBANCO HOLDING tests for Liability Adequacy, by comparing the amount recognized for its technical reserves with the current estimate of cash flow of its future obligations. The estimate should include all cash flows related to the business, which is the minimum requirement for carrying out the adequacy test.

The Liability Adequacy Test did not indicate significant insufficiency in the reporting periods 2019 and 2018.

The assumptions used in the test are periodically reviewed and are based on best practices and an analysis of subsidiaries' experience, thus representing the best estimates for cash flow projections.

Methodology and test grouping

Specifically for insurance products, cash flows were projected using the method known as the run-off triangle for quarterly frequency periods. For pension products, cash flows for the deferral and concession phases are tested separately.

The risk grouping criteria include groups subject to similar risks that are jointly managed as a single portfolio.

Biometric tables

Biometric tables are instruments to measure the biometric risk represented by the probability of death, survival or disability of a participant.

For death and survival estimates, the latest Brazilian Market Insurer Experience tables (BR-EMS) are used, adjusted according to Scale G life expectancy development, and the Álvaro Vindas table is used to estimate benefit requests for disability.

Risk-free interest rate

The relevant risk-free forward interest-rate structure (ETTJ) is an indicator of the pure time value of money used to price the set of projected cash flows.

The ETTJ was obtained from the curve of securities deemed to be credit risk free, available in the Brazilian financial market and determined by ITAÚ UNIBANCO HOLDING using its own method, plus a spread, which takes into account the impact of the market result of securities classified as Financial assets at amortized cost in the Guarantee assets portfolio.

Annuity conversion rate

The annuity conversion rate represents the expected conversion of balances accumulated by participants in retirement benefits. The decision by participants convert into an annuity is influenced by behavioral, economic and tax factors.

Other assumptions

Related expenses, cancellations and partial redemptions, future additions and contributions, are among the assumptions that affect the estimate of projected cash flows since they represent expenses and income arising from insurance agreements assumed.

Note 28 - Fair value of financial instruments

In cases where market prices are not available, fair values are based on estimates using discounted cash flows or other valuation techniques. These techniques are significantly affected by the assumptions adopted, including the discount rate and estimate of future cash flows. The estimated fair value obtained through these techniques cannot be substantiated by comparison with independent markets and, in many cases, cannot be achieved on immediate settlement of the instrument.

The following table summarizes the carrying values and estimated fair values for financial instruments:

		06/30/20	119	12/31/2	018
		Carrying value	Estimated fair value	Carrying value	Estimated fair value
Cash and cash equivalents	(a)	33,242	33,242	37,159	37,159

Loan Commitments		2,975	2,975	2,601	2,601
Financial Guarantees		1,108	1,108	1,191	1,191

Financial instruments not included in the Balance Sheet (Note 32) are represented by Standby letters of credit and financial guarantees provided, which amount to R\$ 77,174 (R\$ 76,852 at 12/31/2018) with an estimated fair value of R\$ 1,080 (R\$ 1,168 at 12/31/2018).

The methods and assumptions used to estimate the fair value are defined below:

- a) Cash and cash equivalents, Central Bank compulsory deposits, Securities purchased under agreements to resell, Securities sold under repurchase agreements – The carrying amounts for these instruments are close to their fair values.
- b) Interbank deposits, Deposits, Interbank and Institutional Market Funds they are calculated by discounting estimated cash flows at market interest rates.
- c) Securities and Derivatives Under normal conditions, the prices quoted in the market are the best indicators of the fair values of these financial instruments. However, not all instruments have liquidity or quoted market prices and, in such cases, it is necessary to adopt present value estimates and other techniques to establish their fair value. In the absence of prices quoted by the Brazilian Association of Financial and Capital Markets Entities (ANBIMA), the fair values of government securities are determined based on the interest rates provided by brokers. The fair values of corporate debt securities are calculated by discounting estimated cash flows at market interest rates. The fair values of shares are based on the prices quoted in the market. The fair values of derivative financial instruments were determined as follows:
 - **Swaps:** The cash flows are discounted to present value based on yield curves that reflect the appropriate risk factors, mainly following swap prices on B3 for derivatives, of Brazilian government securities in the secondary market or derivatives and securities traded abroad. These yield curves may be used to obtain the fair value of currency swaps, interest rate swaps and swaps based on other risk factors (commodities, stock exchange indices, etc.).
 - Futures and forwards: Quotations on exchanges or using criteria identical to those applied to swaps.
 - **Options:** determined through mathematical models, such as Black-Scholes, using data, in general from Bloomberg, for implicit volatility, interest rate yield curve and fair value of the underlying asset. Current market prices of options are used to compute the implicit volatilities.
 - **Loans:** They are inversely related to the probability of default (PD) in a financial instrument subject to credit risk. The process of adjusting the market price of these spreads is based on the differences between the yield curves with and without credit risk.
- d) Loans and financial leasses Fair value is estimated for groups of loans with similar financial and risk characteristics, using valuation models. The fair value of fixed-rate loans was determined by discounting estimated cash flows, at interest rates applicable to similar loans. For the majority of loans at floating rates, the carrying amount was considered to be close to their market value. The fair value of loan and lease operations not overdue was calculated by discounting the expected payments of principal and interest to maturity. The fair value of overdue loan and lease transactions was based on the discount of estimated cash flows, using a rate proportional to the risk associated with the estimated cash flows, or on the underlying collateral. The assumptions for cash flows and discount rates rely on information available in the market and knowledge of the individual debtor.
- e) Other financial assets / liabilities primarily composed of receivables from credit card issuers, deposits in guarantee for contingent liabilities, provisions and legal obligations and trading and intermediation of securities. The carrying amounts for these assets/liabilities substantially approximate to their fair values, since they principally represent amounts to be received in the short term from credit card holders and to be paid to credit card issuers, court deposits (indexed to market rates) made by ITAÚ UNIBANCO HOLDING to secure lawsuits or very short-term receivables (generally with a maturity of approximately 5 business days). All of these items represent assets / liabilities without significant associated market, credit or liquidity risks.

Level 1: Observable inputs that reflect quoted prices (unadjusted) for identical assets or liabilities in active markets. An active market is a market in which transactions for the asset or liability being measured occur often enough and with sufficient volume to provide pricing information on an ongoing basis.

Level 2: Input that is observable for the asset or liability either directly or indirectly. Level 2 generally includes: (i) quoted prices for similar assets or liabilities in active markets; (ii) quoted prices for identical or similar assets or liabilities in markets that are not active, that is, markets in which there are few transactions for the asset or liability, the prices are not current, or quoted prices vary substantially either over time or among market makers, or in which little information is released publicly; (iii) inputs other than quoted prices that are observable for the asset or liability (for example, interest rates and yield curves observable at commonly quoted intervals, volatilities, etc.); (iv) inputs that are mainly derived from or corroborated by observable market data through correlation or by other means.

Level 3: Inputs are not observable for the asset or liability. Unobservable information is used to measure fair value to the extent that observable information is not available, thus allowing for situations in which there is little, or no market activity for the asset or liability at the measurement date.

Financial assets at fair value through profit or loss, including Derivatives, and at fair value through other comprehensive income:

Level 1: Highly-liquid securities with prices available in an active market and derivatives traded on stock exchanges. This classification level includes most of the Brazilian government securities, other foreign government securities, shares and debentures traded on stock exchanges and other securities traded in an active market.

Level 2: When pricing information is not available for a specific security, valuation is usually based on prices quoted in the market for similar instruments, pricing information obtained from pricing services, such as Bloomberg, Reuters and brokers (only when the prices represent actual transactions) or discounted cash flows, which use information for assets actively traded in an active market. These securities are classified at Level 2 of the fair value hierarchy and consist of certain Brazilian government securities, debentures, some government securities quoted in a less liquid market than for Level 1, and some share prices in investment funds.

Derivatives included in Level 2 are credit default swaps, cross-currency swaps, interest rate swaps, simple options and some forwards, since information adopted by pricing models is immediately observable in actively quoted markets. The models used for these instruments are Black-Scholes, Garman & Kohlhagen, Monte Carlo and discounted cash flow.

ITAÚ UNIBANCO HOLDING does not hold positions in alternative investment funds or private equity funds.

Level 3: When there is no pricing information in an active market, ITAÚ UNIBANCO HOLDING uses internally developed models, from curves generated according to a proprietary model. Level 3 classification includes some Brazilian government and private securities falling due after 2025 which are not usually traded in an active market.

Derivatives with fair values classified in Level 3 of the fair value hierarchy are composed of exotic options, certain swaps indexed to non-observable inputs, and swaps with other products, such as swap with options or with verification, credit derivatives and futures of certain commodities.

All the above methods may result in a fair value that is not indicative of the net realizable value or future fair values. However, ITAÚ UNIBANCO HOLDING believes that all the method used are appropriate and consistent with other market participants. Moreover, the adoption of different methods or assumptions to estimate fair value may result in different fair value estimates at the balance sheet date.

Distribution by level

The following table presents the breakdown of fair value hierarchy levels.

		06/30/	/2019			12/31/	2018	
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total

There were no significant transfer between Level 1 and Level 2 during the period as of June 30, 2019. Transfers to and from Level 3 are presented in movements of Level 3.

Measurement of Level 2 fair value based on pricing services and brokers

To ensure that the fair value of these instruments is properly classified as Level 2, inputs from the service provider are analyzes so as to understand their nature.

Prices provided by pricing services that meet the following requirements are considered Level 2: input is immediately available, regularly distributed, provided by sources actively involved in significant markets and it is not proprietary.

Of the total of R\$ 54,828 in financial instruments classified as Level 2, on June 30, 2019, a pricing service or brokers were used to price securities to the value of R\$ 23,901, substantially represented by:

- Debentures: When available, we use price information for transactions recorded in the Brazilian Debenture System (SND), an electronic platform operated by B3, which provides multiple services for transactions involving debentures in the secondary market. Alternatively, prices of debentures provided by ANBIMA are used. Its methodology includes obtaining, on a daily basis, illustrative non-binding prices from a group of market players deemed to be significant. Such information is subject to statistical filters intended to eliminate outliers.
- Global and corporate securities: The pricing process for these securities consists of capturing from 2 to 8 quotes from Bloomberg, depending on the asset. The method then compares the highest purchase prices and the lowest sale prices of trades provided by Bloomberg for the last day of the month. These prices are compared with information from purchase orders that the Institutional Treasury of ITAÚ UNIBANCO HOLDING provides to Bloomberg. Should the difference between them be lower than 0.5%, the average price of Bloomberg is used. If it is higher than 0.5% or if the Institutional Treasury does not provide information on this specific security, the average price gathered directly from other banks is used. The Institutional Treasury price is used as a reference only and never in the computation of the final price.

Level 3 recurring fair value measurements

The departments in charge of defining and applying the pricing models are segregated from the business areas. The models are documented, submitted to validation by an independent area and approved by a specific committee. The daily process of price capture, calculation and disclosure is periodically checked according to formally defined tests and criteria and the information is stored in a single corporate data base.

The most frequent cases of assets classified as Level 3 are justified by the discount factors used. Factors such as the fixed interest curve in Brazilian Reais and the TR coupon curve – and, as a result, their related factors – have inputs with terms shorter than the maturities of fixed-income assets. For swaps, the indexers for both legs are analyzed. There are some cases in which the input periods are shorter than the maturity of the derivative.

Level 3 recurring fair value changes

The tables below show balance sheet changes for financial instruments classified by ITAÚ UNIBANCO HOLDING in Level 3 of the fair value hierarchy. Derivative financial instruments classified in Level 3 correspond to other derivatives indexed to shares.

		Total gains or los unreali				Transfers in	Fair value

Sensitivity analyses of Level 3 operations

The fair value of financial instruments classified in Level 3 is measured through valuation techniques based on correlations and associated products traded in active markets, internal estimates and internal models.

Significant unobservable inputs used for measurement of the fair value of instruments classified in Level 3 are: interest rates, underlying asset prices and volatility. Significant variations in any of these inputs separately may give rise to substantial changes in the fair value.

The table below shows the sensitivity of these fair values in scenarios of changes of interest rates or, asset prices, or in scenarios with varying shocks to prices and volatilities for non-linear assets:

Sensitivity – Level 3 O	perations	06/3	30/2019	06/30/2018 12/31/20		
		In	npact	Impact		
Market risk factor groups	Scenarios	Income	Income Stockholders' equity		Stockholders' equity	
	ļ	(8.0)	(0.0)	(0.9)	(1.20)	
Interest rates	II	(20.2)	(0.6)	(23.1)	(29.30)	
	III	(39.9)	(1.2)	(46.1)	(57.80)	
Shares	I	(58.6)	-	(56.1)	-	
Silales	II (117	(117.3)	-	(112.2)	-	
Nonlinear	1	(17.4)	-	(49.1)	-	
NOTHINEAL	II	(20.6)	-	(89.0)	-	

The following scenarios are used to measure sensitivity:

Interest rate

Based on reasonably possible changes in assumptions of 1, 25 and 50 basis points (scenarios I, II and III respectively) applied to the interest curves, both up and down, taking the largest losses resulting in each scenario.

Shares

Based on reasonably possible changes in assumptions of 5 and 10 percentage points (scenarios I and II respectively) applied to prices of currencies, commodities and share indices, both up and down, taking the largest losses resulting in each scenario.

Non linear

Scenario I: Based on reasonably possible changes in assumptions of 5 percentage points on prices and 25 percentage points on the volatility level, both up and down, taking the largest losses resulting in each scenario.

Scenario II: Based on reasonably possible changes in assumptions of 10 percentage points on prices and 25 percentage points on the volatility level, both up and down, taking the largest losses resulting in each scenario.

Note 29 - Contingent Assets and Liabilities, Provisions and Legal Obligations

In the ordinary course of its business, ITAÚ UNIBANCO HOLDING may be a party to legal proceedings to labor, civil and tax nature. The contingencies related to these lawsuits are classified as follows:

- a) Contingent Assets: There are no contingent assets recorded.
- b) Provisions and contingencies: The criteria to quantify of provisions for contingencies are adequate in relation to the specific characteristics of civil, labor and tax lawsuits portfolios, as well as other risks, taking into consideration the opinion of its legal advisors, the nature of the lawsuits, the similarity with previous lawsuits and the prevailing previous court decisions. A provision is recognized whenever the loss is classified as probable.

Legal liabilities arise from lawsuits filed to discuss the legality and unconstitutionality of the legislation in force, being subject to an accounting provision.

I- Civil lawsuits

In general, provisions and contingencies arise from claims related to the revision of contracts and compensation for material and moral damages. The lawsuits are classified as follows:

Collective lawsuits: Related to claims of a similar nature and with individual amounts that are not considered significant. Provisions are calculated on a monthly basis and the expected amount of losses is accrued according to statistical references that take into account the nature of the lawsuit and the characteristics of the court (Small Claims Court or Regular Court). Contingencies and provisions are adjusted to reflect the amounts deposited into court as guarantee for their execution when realized.

Individual lawsuits: Related to claims with unusual characteristics or involving significant amounts. The probability of loss is ascertained periodically, based on the amount claimed and the special nature of each case. The amounts considered as probable losses are recorded as provisions.

ITAÚ UNIBANCO HOLDING, despite having complied with the rules in force at the time, is a defendant in lawsuits filed by individuals referring to payment of inflation adjustments to savings accounts resulting from economic plants implemented in the 1980s and the 1990s, as well as in collective lawsuits filed by: (i) consumer protection associations; and (ii) the Public Attorney's Office, on behalf of the savings accounts holders. ITAÚ UNIBANCO HOLDING recognizes provisions upon receipt of summons, and when individuals demand the enforcement of a ruling handed down by the courts, using the same criteria as for provisions for individual lawsuits.

The Federal Supreme Court (STF) has issued some decisions favorable to savings account holders, but it has not established its understanding with respect to the constitutionality of the economic plans and their applicability to savings accounts. Currently, the appeals involving these matters are suspended, by order of the STF, until it pronounces its final decision.

In December 2017, through mediation of the Federal Attorney's Office (AGU) and supervision of the BACEN, savers (represented by two civil associations, FEBRAPO and IDEC) and FEBRABAN entered into an instrument of agreement aiming at resolving lawsuits related the economic plans, and ITAÚ UNIBANCO HOLDING has already accepted its terms. The agreement was approved on March 1, 2018, at a Plenary Session on the Federal Supreme Court (STF), with the legal actions accordingly being cancelled. Savers have 24 months from May 22, 2018 to accept the settlement.

II- Labor claims

Provisions for contingencies arise from lawsuits in which labor rights provided for in labor legislation specific to the related profession are discussed, such as: overtime, salary equalization, reinstatement, transfer allowance and, pension plan supplement. These lawsuits are classified as follows:

Collective lawsuits: related to claims considered similar and with individual amounts that are not considered significant. The expected amount of loss is determined and accrued on a monthly basis in accordance with a statistical model which calculates the amount of the claims, and is reassessed taking into account court rulings. Provisions for contingencies are adjusted to reflect the amounts deposited into court as security for execution.

Individual lawsuits: related to claims with unusual characteristics or involving significant amounts. These are periodically calculated based on the amounts claimed. The probability of loss is estimated in accordance with the actual and legal characteristics of each lawsuit.

III- Other Risks

These are quantified and accrued on the basis of the value of rural credit transactions with joint liability and FCVS (salary variations compensation fund) credits assigned to Banco Nacional.

^(*) Civil provisions include the provision for economic plans amounting to R\$ 184.

IV- Tax proceedings and legal obligations

Provisions correspond to the principal amount of taxes involved in administrative or judicial tax lawsuits, subject to tax assessment notices, plus interest and, when applicable, fines and charges.

The table below shows the changes in the provisions:

	01/01 to 06/30/2019	01/01 to 06/30/2018
Opening balance	6,793	7,003
(-) Provisions guaranteed by indemnity clause (Note 2.4 n)	(66)	(66)
Subtotal	6,727	6,937
Adjustment / Interest (*)	243	192
Changes in the period reflected in income	<u>(62)</u>	<u>(55)</u>
Increase ^(*)	207	245
Reversal ^(*)	(269)	(300)
Payment	(55)	(278)
Subtotal	6,853	6,796
(+) Provisions guaranteed by indemnity clause (Note 2.4 n)	69	67
Closing balance	6,922	6,863
Current	100	183
Non-current	6,822	6,680

^(*) The amounts are included in the headings Tax Expenses, General and Administrative Expenses and Current Income Tax and Social Contribution.

The main discussions related to Tax and Tax Lawsuits and Legal Obligations are described below:

- CSLL Isonomy R\$ 1,365: discussing the lack of constitutional support for the increase, established by Law 11,727/08, in the CSLL rate for financial and insurance companies from 9% to 15%. The balance of the court deposit is R\$ 1,354;
- INSS Non-compensatory amounts R\$ 671: the non-levy of social security contribution on amounts paid as profit sharing is defended;
- PIS and COFINS Calculation basis R\$ 636: defending the levy of PIS and COFINS on revenue, a tax on revenue from the sales of assets and services. The balance of the court deposit is R\$ 620.

c) Contingencies not provided for in the Balance Sheet

Amounts involved in administrative and judicial arguments with the risk of loss estimated as possible are not provided for and they are basically composed of:

I- Civil and Labor Claims

In Civil Lawsuits with possible loss, total estimated risk is R\$ 4,185 (R\$ 3,879 at December 31, 2018), and in this total there are no amounts arising from interests in Joint Ventures. For Labor Claims with possible loss, estimated risk is R\$ 188 (R\$ 177 at December 31, 2018).

II - Tax proceedings

The tax proceedings of possible loss totaled R\$ 27,936, and the main cases are described below:

- INSS Non-compensatory amounts R\$ 6,209: defends the non-levy of this contribution on these amounts, among which are profit sharing and stock options;
- IRPJ, CSLL, PIS and COFINS Funding Expenses R\$ 4,025: the deductibility of raising costs (Interbank deposits rates) for funds that were capitalized between Group companies;
- IRPJ and CSLL Goodwill Deduction R\$ 2,961: the deductibility of goodwill for future expected profitability on the acquisition of investments;
- PIS and COFINS Reversal of Revenues from Depreciation in Excess R\$ 1,968: discussing the accounting and tax treatment of PIS and COFINS upon settlement of leasing operations;
- IRPJ, CSLL, PIS and COFINS Requests for offsetting dismissed R\$ 1,809: cases in which the liquidity and the certainty of credits offset are discussed;
- IRPJ and CSLL Interest on capital R\$ 1,534: defending the deductibility of interest paid to stockholders at the Brazilian long term interest rate (TJLP) on stockholders' equity for the year and for prior years;
- ISS Banking Institutions R\$ 1,211: these are banking operations, revenue from which may not be interpreted as prices for services rendered, and/or which arises from activities not listed under Supplementary Law No. 116/03 or Decree Law No. 406/68;
- IRPJ and CSLL Disallowance of Losses R\$ 1,132: discussion on the calculation of income tax (IRPJ) and/or social contribution (CSLL) credits used by the Federal Revenue Service when drawing up tax assessment notes that are still pending a final decision;
- IRPJ and CSLL Deductibility of Losses in Credit Operations R\$ 678 Assessments to require the
 payment of IRPJ and CSLL due to the alleged non-observance of the legal criteria for the deduction of
 losses on receipt of credits.

d) Accounts Receivables - Reimbursement of Provisions

The receivables balance arising from reimbursements of contingencies totals R\$ 1,023 (R\$ 999 at December 31, 2018) (Note 18a), arising basically from the collateral established in Banco Banerj S.A. privatization process occurred in 1997, when the State of Rio de Janeiro created a fund to guarantee the equity recomposition in provisions for Civil, Labor and Tax Claims.

e) Guarantees of contingencies, provisions and legal obligations

The guarantees related to legal proceedings involving ITAÚ UNIBANCO HOLDING and basically consist of:

		12/31/2018			
•	Civil	Labor	Tax (*)	Total	Total
Deposits in guarantee	1,522	2,427	10,443	14,392	13,534
Quotas	769	599	325	1,693	2,169
Surety	59	163	1,626	1,848	1,880
Insurance bond	1,672	702	11,060	13,434	12,103
Guarantee by government securities	40	-	503	543	539
Total	4,062	3,891	23,957	31,910	30,225

(*) Deposits in guarantee, in favorable withdrawal status, totaled the amount of R\$ 760 at June 30, 2019.

ITAÚ UNIBANCO HOLDING's provisions for judicial and administrative challenges are long-term, considering the time required for their questioning, and this prevents the disclosure of a deadline for their conclusion.

The legal advisors believe that ITAÚ UNIBANCO HOLDING is not a party to this or any other administrative proceedings or lawsuits that could significantly affect the results of its operations.

Note 30 - Segment Information

The current operational and reporting segments of ITAÚ UNIBANCO HOLDING are described below:

Retail Banking

The segment comprises retail customers, account holders and non-account holders, individuals and legal entities, high income clients (Itaú Uniclass and Personnalité) and the companies segment (microenterprises and small companies). It includes financing and credit offers made outside the branch network, in addition to credit cards and payroll loans.

Wholesale Banking

It comprises products and services offered to middle-market companies, high net worth clients (Private Banking), and the operation of Latin American units and Itaú BBA, which is the unit responsible for business with large companies and Investment Banking operations.

• Trading + Institutional

Basically corresponds to the result arising from capital surplus, subordinated debt surplus and the net balance of tax credits and debits. It also includes the financial margin on market trading, Treasury operating costs, and equity in earnings of companies not included in either of the other segments.

a) Basis of presentation

Segment information is based on the reports used by senior management to assess performance and to make decisions about allocation of funds for investment and other purposes.

These reports use a variety of information for management purposes, including financial and non-financial information supported by bases different from information prepared according to accounting practices adopted in Brazil. The main indicators used for monitoring business performance are Recurring Income, and Return on Economic Capital allocated to each business segment.

Information by segment has been prepared in accordance with accounting practices adopted in Brazil and is adjusted by the items below:

Allocated capital: The statements for each segment consider capital allocation based on a proprietary model and consequent impacts on results arising from this allocation. This model includes the following components: Credit risk, operating risk, market risk and insurance underwriting risk.

Income tax rate: We take the total income tax rate, net of the tax effect from the payment of interest on capital, for the Retail Banking, Wholesale Banking and Trading segments. The difference between the income tax amount calculated by segment and the effective income tax amount, as stated in the consolidated financial statements, is allocated to the Trading + Institutional column.

Reclassification and application of managerial criteria

The managerial statement of income was used to prepare information per segment. These statements were obtained based on the statement of income adjusted by the impact of non-recurring events and the managerial reclassifications in income.

The main reclassifications between the accounting and managerial results are:

Banking product: Considers the opportunity cost for each operation. The financial statements were adjusted so that the stockholders' equity was replaced by funding at market price. Subsequently, the financial statements were adjusted to include revenues related to capital allocated to each segment. The cost of subordinated debt and the respective remuneration at market price were proportionally allocated to the segments, based on the economic capital allocated.

Tax effects of hedging: The tax effects of hedging of investments abroad were adjusted – they were originally recorded as tax expenses (PIS and COFINS) and Income Tax and Social Contribution on Net Income – and are now reclassified to financial margin.

Insurance: The main reclassifications of revenues refer to the financial margins obtained from technical provisions for insurance, pension plans and capitalization, in addition to revenue from management of pension plan funds.

Other reclassifications: Other Income, Share of Income of Associates and joint ventures, Non-Operating Income, Profit Sharing of Management Members and Expenses for Credit Card Reward Program were reclassified to those lines representing the way the ITAÚ UNIBANCO HOLDING manages its business, to provide a clearer understanding of our performance.

The adjustments and reclassifications column shows the effects of the differences between the accounting principles followed for the presentation of segment information, which are substantially in line with the accounting practices adopted for financial institutions in Brazil, except as described above, and the policies used in the preparation of these consolidated financial statements according to IFRS. Significant adjustments are as follows:

- Requirements for impairment testing of financial assets are based on the expected loan losses model;
- Adjustment to fair value due to reclassifications of financial assets to categories of measurement at amortized cost, at fair value through profit and loss or at fair value through other comprehensive income, as a result of the concept of business models of IFRS 9;
- Financial assets modified and not written-off, with their balances recalculated in accordance with the requirements of IFRS 9;
- Effective interest rate of financial assets and liabilities measured at amortized cost, appropriating
 revenues and costs directly attributable to their acquisition, issue or disposal over the transaction term,
 whereas in the standards adopted in Brazil, recognition of expenses and revenues from fees occurs at
 the time these transactions are contracted;

Goodwill generated in a business combination is not amortized, whereas in the standards adopted in Brazil, it is amortized.

Note 32 - Risk and Capital Management

a) Corporate Governance

ITAÚ UNIBANCO HOLDING invests in sound processes for risk and capital management that permeates the whole institution and are the basis of all strategic decisions to ensure business sustainability.

These processes are aligned with the guidelines of the Board of Directors and Executive which, through collegiate bodies, define the global objectives expressed as targets and limits for the business units that manage risk. Control and capital management units, in turn, support ITAÚ UNIBANCO HOLDING's management by monitoring and analyzing risk and capital.

The Board of Directors is the main body responsible for establishing guidelines, policies and approval levels for risk and capital management. The Capital and Risk Management Committee (CGRC), in turn, is responsible for supporting the Board of Directors in managing capital and risk. At the executive level, collegiate bodies, presided over by the Chief Executive Officer (CEO) of ITAÚ UNIBANCO HOLDING, are responsible for capital and risk management, and their decisions are monitored by the CGRC.

Additionally, ITAÚ UNIBANCO HOLDING has collegiate bodies with capital and risk management responsibilities delegated to them, chaired by the Executive Vice-President of the Risk and Finance Department (ARF). To support this structure, ARF has departments to ensure, on an independent and centralized basis, that the institution's risks and capital are managed in compliance with defined policies and procedures.

b) Risk Management

Risk Appetite

The risk appetite of ITAÚ UNIBANCO HOLDING is based on the Board of Director's statement:

"We are a universal bank, operating mainly in Latin America. Supported by our risk culture, we insist on with strict ethical standards and regulatory compliance, seeking high and increasing returns, with low volatility, through lasting relationships with our customers, accurate risk pricing, widespread funding and proper use of capital."

Based on this statement, five dimensions have been defined (Capitalization, Liquidity, Composition of Earnings, Operating Risk and Reputation). Each dimension consists of a set of metrics associated with the main risks involved, combining supplementary measurement methods, to give a comprehensive vision of our exposure.

The Board of Directors is responsible for approving guidelines and limits for risk appetite, with the support of CGRC and the CRO (Chief Risk Officer).

The limits for risk appetite are monitored regularly and reported to risk committees and to the Board of Directors, which will oversee the preventive measures to be taken to ensure that exposure is aligned with the strategies of ITAÚ UNIBANCO HOLDING.

The five dimensions of risk appetite are:

- Capitalization: establishes that ITAÚ UNIBANCO HOLDING must have capital sufficient to face any serious recession period or a stress event without the need to adjust its capital structure under unfavorable circumstances. It is monitored by tracking ITAÚ UNIBANCO HOLDING's capital ratios, both in normal and stress scenarios, and of the ratings of the institution's debt issues.
- **Liquidity:** establishes that the liquidity of ITAÚ UNIBANCO HOLDING must withstand long periods of stress. It is monitored tracking liquidity indicators.
- Composition of results: defines that business will be focused primarily on Latin America, where ITAÚ UNIBANCO HOLDING has a diversified base of customers and products, with low appetite for income volatility or for high risk. This dimension comprises aspects related to business, profitability, market risk and credit risk. By adopting exposure concentration limits, such as industry sectors, counterparty quality, countries and geographical regions and risk factors, these monitored metrics are intended to ensure well-adjusted portfolios, low income volatility and business sustainability.

- **Operational risk:** focuses on the control of operating risk events that may adversely impact business and operating strategy, and involves monitoring the main operational risk events and losses incurred.
- **Reputation:** addresses risks that may impact the institution's brand value and reputation with customers, employees, regulatory bodies, investors and the general public. The risk monitoring in this dimension is carried out by tracking customer satisfaction or dissatisfaction and media exposure, in addition to monitoring the institution's conduct.

Risk appetite, risk management and guidelines for employees of ITAÚ UNIBANCO HOLDING CONSOLIDATED for routine decision-making purposes are based on:

- Sustainability and customer satisfaction: ITAÚ UNIBANCO HOLDING vision is to be the leading bank in sustainable performance and customer satisfaction and, accordingly, we are committed to creating shared value for staff, customers, shareholders and society, ensuring the continuity of the business. ITAÚ UNIBANCO HOLDING is committed to doing business that is good both for the customer and the institution itself;
- Risk Culture: ITAÚ UNIBANCO HOLDING's risk culture goes beyond policies, procedures or processes, reinforcing the individual and collective responsibility of all employees so that they will do the right thing at the right time and in the proper manner, respecting the ethical way of doing business;
- Risk pricing: ITAÚ UNIBANCO HOLDING's acts and assumes risks in business which it knows and understands, avoiding those with which it is unfamiliar or that do not offer a competitive edge, and carefully assessing the risk-return ratio;
- **Diversification:** ITAÚ UNIBANCO HOLDING has little appetite for volatility in earnings, and it therefore operates with a diverse base of customers, products and business, seeking to diversify risks and giving priority to lower risk business.
- Operational excellence: It is the wish of ITAÚ UNIBANCO HOLDING to be an agile bank, with a robust and stable infrastructure enabling us to offer top quality services;
- Ethics and respect for regulations: for ITAÚ UNIBANCO HOLDING, ethics is non-negotiable, and it therefore promotes an institutional environment of integrity, encouraging staff to cultivate ethics in relationships and business and to respect the rules, thus caring for the institution's reputation.

ITAÚ UNIBANCO HOLDING has various ways of disseminating risk culture, based on four principles: conscious risk-taking, discussion of the risks the institution faces, the corresponding action taken, and the responsibility of everyone for managing risk.

These principles serve as a basis for ITAÚ UNIBANCO HOLDING guidelines, helping employees to conscientiously understand, identify, measure, manage and mitigate risks.

1. Credit risk

The possibility of losses arising from failure by a borrower, issuer or counterparty to meet their financial obligations, the impairment of a loan due to downgrading of the risk rating of the borrower, the issuer or the counterparty, a decrease in earnings or remuneration, advantages conceded on renegotiation or the costs of recovery.

There is a credit risk control and management structure, centralized and independent from the business units, that provides for operating limits and risk mitigation mechanisms, and also establishes processes and tools to measure, monitor and control the credit risk inherent in all products, portfolio concentrations and impacts of potential changes in the economic environment.

The credit policy of ITAÚ UNIBANCO HOLDING is based on internal criteria such as: classification of customers, portfolio performance and changes, default levels, rate of return and economic capital allocated, and external factors such as interest rates, market default indicators, inflation, changes in consumption, and so on.

For personal customers and small and middle-market companies, credit rating is based on statistical application models (at the early stages of the relationship with a customer) and behavior score (used for customers with which ITAÚ UNIBANCO HOLDING already has a relationship).

For large companies, the rating is based on information such as economic and financial condition of the counterparty, their cash-generating capability, the economic group to which they belong, and the current and prospective situation of the economic sector in which they operate. Credit proposals are analyzed on a case by case basis, through an approval-level mechanism.

In compliance with CMN Resolution 4,557, of February 23, 2017, the document "Public Access Report – Credit Risk", which includes the guidelines established by our credit risk control policy, can be viewed at www.itau.com.br/investor-relations, under Corporate Governance, Regulations and Policies.

ITAÚ UNIBANCO HOLDING strictly controls the credit exposure of customers and counterparties, taking action to address situations in which the current exposure exceeds what is desirable. For this purpose, measures provided for in loan agreements are available, such as accelerated maturity or a requirement for additional collateral.

1.1 Collateral and policies for mitigating credit risk

ITAÚ UNIBANCO HOLDING uses guarantees to increase its capacity for recovery in operations exposed to credit risk. The guarantees may be personal, secured, legal structures with mitigating power and offset agreements.

For collateral to be considered instruments that mitigate credit risk, they must comply with the requirements and standards that regulate them, both internal and external ones, and they must be legally valid (effective), enforceable, and assessed on a regular basis.

ITAÚ UNIBANCO HOLDING also uses credit derivatives, to mitigate credit risk of its portfolios of loans and securities. These instruments are priced based on models that use the fair value of market inputs, such as credit spreads, recovery rates, correlations and interest rates.

1.2 Policy for Provisioning and Economic Scenarios

Both the credit risk and the finance areas are responsible for defining the methods used to measure expected loan losses and for periodically assessing changes in the provision amounts.

These areas monitor the trends observed in provisions for expected credit losses by segment, in addition to establishing an initial understanding of the variables that may trigger changes in the allowance for loan losses, the probability of default (PD) or the loss given default (LGD).

Once the trends have been identified and an initial assessment of the variables has been made at the corporate level, the business areas are responsible for further analyzing these trends in more detail and for each segment, in order to understand the underlying reasons for the trends and to decide whether changes are required in credit policies.

Provisions for expected losses take into account the expected risk linked to contracts with similar characteristics and in anticipation of signs of deterioration, over a loss horizon suitable for the remaining period of the contract to maturity. For contracts of products with no determined termination date, average results of deterioration and default are used to determine the loss horizon.

Additionally, information on economic scenarios and public data with internal projections are used to determine and adjust the expected credit loss in line with expected macroeconomic realities.

1.3 Classification of Stages of Credit Impairment

ITAÚ UNIBANCO HOLDING uses customers' internal information, statistic models, days of default and quantitative analysis in order to determine the credit status of portfolio agreements.

Rules for changing stages take into account lower and higher internal limits (quantitative criteria), in addition to the relative variation in the rating since the initial recognition. Information on days of delay, used on an absolute basis, is an important factor for the classification of stages, and after a certain credit status has been defined for an agreement, it is classified in one of the three stages of credit deterioration. Based on this classification, rules for measuring expected credit loss in each stage are used, as described in Note 2.4e.

For retail and middle market portfolios, ITAÚ UNIBANCO HOLDING classifies loan agreements which are over 30 days overdue in stage 2, except payroll loans for public bodies, for which the figure is 45 days, due to the payment dynamics for onlending.

For the Wholesale business portfolio, information on arrears is taken into account when allocating a rating.

Default parameters are: 90 days with no payments made^(*); debt restructuring; adjudication of bankruptcy; loss; and court-ordered restructuring.

(*) For the real estate loans portfolio, the figure is 180 days with no payments made.

1.4 Maximum Exposure of Financial Assets to Credit Risk

		06/30/2019			12/31/2018

Financial Guarantees	51,998	12,661	64,659	53,443	12,662	66,105
Letters of credit to be released	12,515	-	12,515	10,747	-	10,747
Loan commitments	259,092	37,391	296,483	236,332	36,511	272,843
Mortgage loans	3,755	-	3,755	3,403	-	3,403
Overdraft accounts	116,973	-	116,973	110,454	-	110,454
Credit cards	136,722	2,703	139,425	120,862	2,961	123,823
Other pre-approved limits	1,642	34,688	36,330	1,613	33,550	35,163
Total	1,350,975	364,774	1,715,749	1,324,360	352,271	1,676,631

Amounts shown for credit risk exposure are based on gross book value and do not take into account any collateral received or other added credit improvements.

The contractual amounts of financial collaterals and letters of credit cards represent the maximum potential of credit risk in the event that a counterparty does not meet the terms of the agreement. The vast majority of loan commitments (mortgage loans, overdraft accounts and other pre-approved limits) mature without being drawn, since they are renewed monthly and can be cancelled unilaterally.

As a result, the total contractual amount does not represent our real future exposure to credit risk or the liquidity needs arising from such commitments.

⁽¹⁾ In general requires financial collaterals.

Of total loans and financial lease operations, R\$ 238,166 (R\$ 222,481 at 12/31/2018) represented unsecured loans.

⁽²⁾ Vehicles themselves are pledged as collateral, as well as assets leased in lease operations.

⁽³⁾ Properties themselves are pledged as collateral.

⁽⁴⁾ Any collateral set forth in the credit policy of ITAÚ UNIBANCO HOLDING (chattel mortgage, surety/joint debtor, mortgage and others).

1.4.4 Repossessed assets

Assets received from the foreclosure of loans, including real estate, are initially recorded at the lower of: (i) the fair value of the asset less the estimated selling expenses, or (ii) the carrying amount of the loan.

Further impairment of assets is recorded as a provision, with a corresponding charge to income. The maintenance costs of these assets are expensed as incurred.

The policy for sales of these assets includes periodic auctions that are announced to the market in advance, and provides that the assets cannot be held for more than one year, as stipulated by BACEN.

Total assets repossessed in the period were R\$ 182 (R\$ 219 from 01/01 to 06/30/2018), mainly composed of real estate.

2. Market risk

The possibility of incurring financial losses from changes in the market value of positions held by a financial institution, including the risks of transactions subject to fluctuations in currency rates, interest rates, share prices, price indexes and commodity prices.

ITAÚ UNIBANCO HOLDING's market risk management strategy is aimed at balancing corporate business goals, taking into account, among other things, political, economic and market conditions, the portfolio profile and the ability to operate in specific markets.

Market risk is controlled by an area independent from the business areas, which is responsible for the daily activities of (i) risk measurement and assessment, (ii) monitoring of stress scenarios, limits and alerts, (iii) application, analysis and testing of stress scenarios, (iv) risk reporting to those responsible within the business areas, in compliance with the governance of ITAÚ UNIBANCO HOLDING, (v) monitoring of actions required to adjust positions and risk levels to make them realistic, and (vi) providing support for the safe launch of new financial products.

The National Monetary Council (CMN) has regulations governing the segregation of exposure to market risk into risk factors, such as: interest rate, exchange rate, equities and commodities. Brazilian inflation indexes are treated as a group of risk indicators and limits are managed in the same way as for the other indicators.

The structure of limits and alerts obeys the Board of Directors' guidelines, and it is reviewed and approved on an annual basis. This structure has specific limits aimed at improving the process of monitoring and understanding risk, and at avoiding concentration. These limits are quantified by assessing the forecast balance sheet results, the size of shareholders' equity, market liquidity, complexity and volatility, and the institution's appetite for risk.

In order to operate within the defined limits, ITAÚ UNIBANCO HOLDING CONSOLIDATED hedges transactions with customers and proprietary positions, including its foreign investments. Derivatives are commonly used for these hedging activities, which can be either accounting or economic hedges, both governed by the institutional polices of ITAÚ UNIBANCO HOLDING.

The market risk structure categorizes transactions as part of either the banking portfolio or the trading portfolio, in accordance with general criteria established by CMN Resolution 4,557, of February 23, 2017, and BACEN Circular 3,354, of June 27, 2007. The trading portfolio consists of all transactions involving financial instruments and commodities, including derivatives, which are held for trading. The banking portfolio is basically characterized by transactions for the banking business, and transactions related to the management of the balance sheet of the institution, where there is no intention of sale and time horizons are medium and long term.

Market risk management is based on the following metrics:

• Value at risk (VaR): a statistical measure that estimates the expected maximum potential economic loss under normal market conditions, considering a certain time horizon and confidence level;

- Losses in stress scenarios: simulation technique to assess the behavior of assets, liabilities and derivatives of a portfolio when several risk factors are taken to extreme market situations (based on prospective and historical scenarios);
- Stop loss: metrics used to revise positions, should losses accumulated in a fixed period reach a certain level;
- Concentration: cumulative exposure of a certain financial instrument or risk factor, calculated at market value (MtM – Marked to Market); and
- Stressed VaR: statistical metric derived from the VaR calculation, with the purpose is of simulating higher risk in the trading portfolio, taking returns that can be seen in past scenarios of extreme volatility.

Management of interest rate risk in the Banking Book (IRRBB) is based on the following metrics:

- ΔEVE: difference between the present value of the sum of repricing flows of instruments subject to IRRBB in a base scenario and the present value of the sum of repricing flows of these instruments in a scenario of interest rate shock:
- \(\Delta \text{NII} \): difference between the result of financial intermediation of instruments subject to IRRBB in a base scenario and the result of financial intermediation of these instruments in a scenario of shock in interest rates.

In addition, sensitivity and loss control measures are also analyzed. They include:

- Mismatching analysis (GAPS): accumulated exposure by risk factor of cash flows expressed at market value, allocated at the maturity dates;
- Sensitivity (DV01- Delta Variation): impact on the market value of cash flows, when submitted to an one annual basis point increase in the current interest rates or index rate;
- Sensitivity to Sundry Risk Factors (Greeks): partial derivatives of an option portfolio in relation to the prices of underlying assets, implied volatilities, interest rates and time.

ITAÚ UNIBANCO HOLDING uses proprietary systems to measure the consolidated market risk. The processing of these systems occurs in a high-availability access-controlled environment, which has data storage and recovery processes and an infrastructure that ensures business continuity in contingency (disaster recovery) situations.

The document "Public Access Report – Market Risk", which includes the guidelines established by our market risk control policy, is not an integral part of the financial statements, but may be viewed on the website www.itau.com.br/investor-relations, in the section Corporate Governance/Rules and Policies. For a detailed view of Market Risk and Interest Rate Risk in the Banking Portfolio, see the chapter on Market Risk in the Publication on Risk and Capital Management - Pillar 3.

2.1 VaR - Consolidated ITAÚ UNIBANCO HOLDING

Is calculated by Historical Simulation, i.e. the expected distribution for profits and losses (P&L) of a portfolio over time can be estimated from past behavior of returns of market risk factors for this portfolio. VaR is calculated at a confidence level of 99%, historical period of 4 years (1000 business days) and a holding period of one day. In addition, in a conservative approach, VaR is calculated daily, with and without volatility weighting, and the final VaR is the more restrictive of the values given by the two methods.

From January 1 to June 30, 2019, the average total VaR in Historical Simulation was R\$ 373.4 ou 0.29% of total stockholders' equity (R\$ 399.3 or 0.26% of total stockholders' equity 01/01 to 12/31/2018).

			VaR To	tal (Historic	al Simulation	(Reais million)

⁽¹⁾ The difference arises from the mismatch between the maturities of all remunerated assets and liabilities, at the respective period-end date, considering the contractually agreed terms.

2.1.2 Currency risk

The table below shows the accounting exposure to currency risk of financial assets and liabilities and reflects ITAÚ UNIBANCO HOLDING's currency risk management.

	06/30/2019	
	Dollar Chilean Other T	otal
Net exposure of financial instruments	(54,203) 8,381 14,976 (30,846)
	12/31/2018	
	Chilean	
	Dollar Peso Other T	otal

2.1.3 Share Price Risk

The exposure to share price risk is disclosed in Note 5, related to Financial Assets Through Profit or Loss - Securities, and Note 8, related to Financial Assets at Fair Value Through Other Comprehensive Income - Securities.

3. Liquidity risk

The possibility that the institution may be unable to efficiently meet its expected and unexpected obligations, both current and future, including those arising from guarantees issued, without affecting its daily operations and without incurring significant losses.

Liquidity risk is controlled by an area independent from the business area and responsible for establishing the reserve composition, estimating the cash flow and exposure to liquidity risk in different time horizons, and for monitoring the minimum limits to absorb losses in stress scenarios for each country where ITAÚ UNIBANCO HOLDING operates. All activities are subject to verification by independent validation, internal control and audit areas.

Liquidity management policies and limits are based on prospective scenarios and senior management's guidelines. These scenarios are reviewed on a periodic basis, by analyzing the need for cash due to atypical market conditions or strategic decisions by ITAÚ UNIBANCO HOLDING.

The document Public Access Report - Liquidity Risk, that expresses our internal policy guidelines on liquidity risk, is not part of the financial statements, but may be viewed on the website www.itau.com.br/investor-relations, in the section Itaú Unibanco, Corporate Governance, Rules and Policies.

ITAÚ UNIBANCO HOLDING manages and controls liquidity risk on a daily basis, using procedures approved in superior committees, including the adoption of liquidity minimum limits, sufficient to absorb possible cash losses in stress scenarios, measured with the use of internal and regulatory methods.

Additionally the following items for monitoring and supporting decisions are periodically prepared and submitted to senior management:

- Different scenarios projected for changes in liquidity;
- · Different scenarios projected for changes in liquidity;
- Contingency plans for crisis situations;
- · Reports and charts that describe the risk positions;
- Assessment of funding costs and alternative sources of funding;
- Monitoring of changes in funding through a constant control of sources of funding, considering the type of investor, maturities and other factors.

3.1 Primary sources of funding

ITAÚ UNIBANCO HOLDING has different sources of funding, of which a significant portion is from the retail segment. Of total customers' funds, 42.7% or R\$ 277.9 billion, are immediately available to customers. However, the historical behavior of the accumulated balance of the two largest items in this group – demand and savings deposits - is relatively consistent with the balances increasing over time and inflows exceeding outflows for monthly average amounts.

Conding from costomore	06/3	30/2019		12/3	12/31/2018			
Funding from customers	0-30 days	Total	%	0-30 days	Total	%

⁽¹⁾ Includes mortgage notes, guaranteed real estate credit bills, agribusiness, financial recorded in interbank markets funds and Obligations on the issue of debentures, Securities abroad and strutured operations certificates recorded in Institutional Markets Funds.

3.2 Control over liquidity

ITAÚ UNIBANCO HOLDING manages its liquidity reserves based on estimates of funds that will be available for investment, assuming the continuity of business in normal conditions.

During the period of 2019, ITAÚ UNIBANCO HOLDING maintained sufficient levels of liquidity in Brazil and abroad. Liquid assets (cash and cash equivalents, securities purchased under agreements to resell - funded position and government securities – free as shown in the table Undiscounted future flows – Financial assets) totaled R\$ 161.7 billion and accounted for 58.2% of the short term redeemable obligations, 24.8% of total funding, and 15.9% of total assets.

The table below shows the indicators used by ITAÚ UNIBANCO HOLDING in the management of liquidity risk:

Liquidity indicators	06/30/2019 %	12/31/2018 %
Net assets ⁽¹⁾ / customers funds within 30 days ⁽²⁾	58.2	62.7
Net assets (1) / total customers funds (3)	24.8	24.6
Net assets (1) / total financial assets (4)	15.9	15.8

⁽¹⁾ Net assets: Cash and cash equivalents, Securities purchased under agreements to resell – Funded position and Government securities - available. Detailed in the table Non discounted future flows – Financial assets;

⁽²⁾ Refer to deposits received under securities repurchase agreements with securities from own issue.

c) Capital Management Governance

ITAÚ UNIBANCO HOLDING is subject to the requirements of BACEN, which determines minimum capital requirements, procedures to obtain information to assess the global systemic importance of banks, fixed asset limits, loan limits and accounting practices, and requires banks to conform to the regulations based on the Basel Accord for capital adequacy. Additionally, CNSP and SUSEP issue regulations on capital requirements that affect our insurance operations and private pension and savings bonds plans.

The capital statements were prepared in accordance with BACEN's regulatory requirements and with internationally accepted minimum requirements according to the Bank for International Settlements (BIS).

I - Composition of capital

The Referential Equity (PR) used to monitor the compliance with the operatingl limits imposed by BACEN, is the sum of three items, namely:

- Common Equity Tier I: the sum of capital, reserves and retained earnings, less deductions and prudential adjustments.
- Additional Tier I Capital: consists of instruments of a perpetual nature, which meet eligibility requirements. Together with Common Equity Tier I it makes up Tier I.
- Tier II Capital: consists of subordinated debt instruments with defined maturity dates that meet eligibility requirements. Together with the Common Equity Tier I and the Additional Tier I Capital, it makes up the Total Capital.

Composition of Reference Equity

	06/30/2019	12/31/2018
Stockholders' equity attributable to controlling interests	125,737	131,757
Non-controlling interests	12,428	12,276
Change in interest in subsidiaries in a capital transaction	50	98
Consolidated Stockholders' Equity (BACEN)	138,215	144,131
Common Equity Tier I Prudential Adjustments	(22,717)	(20,773)
Common Equity Tier I	115,498	123,358
Instruments Eligible to Comprise Additional Tier I	10,769	7,701
Additional Tier I Prudential Adjustments	106	95
Additional Tier I Capital	10,875	7,796
Tier I (Common Equity Tier I + Additional Tier I Capital)	126,373	131,154
Instruments Eligible to Comprise Tier II	11,833	15,778
Tier II Prudential Adjustments	61	96
Tier II	11,894	15,874
Referential Equity (Tier I + Tier II)	138,267	147,028

Funds from the issuance of subordinated debt securities are considered Tier II capital for purpose of capital to risk-weighted assets ratio, as shown below. According to current legislation, the balance of subordinated debt in December 2012 was used for calculating the reference equity as of June 2019, totaling R\$ 34,915.

Name of security / currency	Principal amount (original currency)	Issue Maturity		Return p.a.	Account balance 06/30/2019

Total					34,915	

II - Capital Requirements in Place and In Progress

ITAÚ UNIBANCO HOLDING's minimum capital requirements are expressed as ratios obtained from the ratio between available capital and the Risk-Weighted Assets (RWA).

Schedule for Basel III implementation

	As From January 1 st .			
	2018	2019 ⁽¹⁾		
Common Equity Tier I	4.5%	4.5%		
Tier I	6.0%	6.0%		
Total Capital	8.625%	8.0%		
Additional Capital Buffers (ACP)	2.375%	3.5%		
Conservation	1.875%	2.5%		
Countercyclical ⁽²⁾	0%	0%		
Systemic (3)	0.5%	1.0%		
Common Equity Tier I + ACP	6.875%	8.0%		
Total Capital + ACP	11.0%	11.5%		
Prudential Adjustments Deductions	100%	100%		

⁽¹⁾ Requirements in force as from January 1 st, 2019.

III - Risk-Weighted Assets (RWA)

For calculating minimum capital requirements, RWA must be obtained by taking the sum of the following risk exposures:

$$RWA = RWA_{CPAD} + RWA_{MINT} + RWA_{OPAD}$$

⁽²⁾ ACP _{Countercyclical} is triggered during the credit cycle expansion phase. Additionally, in the event of increase of countercyclical additional, the new percentage will be in effect only twelve months after it is announced.

⁽³⁾ The calculation of ACP _{Systemic} associates the systemic importance, represented by the institution's total exposure, to Gross Domestic Product (GDP).

	06/30/2019	12/31/2018
Credit risk (RWA _{CPAD}) ⁽¹⁾	724,300	714,969
Market risk (RWA _{MINT}) ⁽²⁾	41,360	30,270
Operating risk (RWAP _{OPAD}) ⁽³⁾	81,341	72,833
Total risk-weighted assets	847,001	818,072

⁽¹⁾ Portion related to exposures to credit risk, calculated using the standardized approach;

The tables below present the breakdown of credit, market and operational risk weighted assets, respectively.

a) Credit Risk

Breakdown of Credit Risk Weighted by Credit Risk (RWA_{CPAD})

	06/30/2019	12/31/2018
Credit Risk Weighted Assets (RWA _{CPAD})	724,300	714,969
Marketable securities	40,506	40,276
Loan Operations - Retail	129,621	124,356
Loan Operations - Non-Retail	264,657	256,958
Joint Liabilities - Retail	146	140
Joint Liabilities - Non-Retail	42,867	43,288
Loan Commitments - Retail	36,922	33,871
Loan Commitments - Non-Retail	11,507	10,673
Derivatives – Future potential gain	4,748	4,193
Intermediation	1,350	3,330
Other exposures	191,976	197,884

b) Market Risk

	06/30/2019 ⁽¹⁾	12/31/2018 ⁽¹⁾
Market Risk Weighted Assets - Standard Aproach (RWA _{MPAD})	51,700	37,838
Operations subject to interest rate variations	47,413	30,286
Fixed rate denominated in reais	1,976	2,026
Foreign exchange coupons	37,388	19,633
Price index coupon	8,049	8,627
Operations subject to commodity price variation	900	389
Operations subject to stock price variation	805	362
Operations subject to risk exposures in gold, foreign currency and foreign exchange variation	2,582	6,801
Minimum Market Risk Weighted Assets - Standard Aproach (RWA _{MPAD}) (1) (a)	41,360	30,270
Market Risk Weighted Assets calculated based on internal methodology (b)	40,008	22,871
Reduction of Market Risk Weighted Assets due to Internal Models Aproach	(10,340)	(7,568)
Market Risk Weighted Assets (RWA _{MINT}) - maximum of (a) and (b)	41,360	30,270

⁽¹⁾ Calculated based on internal models, with maximum saving possibility of 20% of the standard model.

At June 30, 2019, RWA_{MINT} totaled R\$ 41,360, which corresponds to 80% of RWA_{MPAD}, higher than the capital calculated at internal models, which totaled R\$ 40,008.

⁽²⁾ Portion related to capital required for market risk, composed of the maximum between the internal model and 80% of the standardized model, regulated by BACEN Circulars 3,646 and 3,674;

⁽³⁾ Portion related to capital required for operational risk, calculated based on the standardized approach.

c) Operational Risk

	06/30/2019	12/31/2018
Operating Risk-Weighted Assets (RWA _{OPAD})	81,341	72,833
Retail	13,985	12,822
Commercial	27,818	26,214
Corporate finance	2,819	2,697
Negotiation and sales	15,461	11,736
Payments and settlement	8,897	8,282
Financial agent services	4,672	4,343
Asset management	7,661	6,715
Retail brokerage	27	24

IV - Capital Adequacy

The Board of Directors is the body responsible for approving the institutional capital management policy and guidelines for the capitalization level of ITAÚ UNIBANCO HOLDING. The Board is also responsible for the full approval of the ICAAP (Internal Capital Adequacy Assessment Process) report, the purpose of which is to assess the capital adequacy of ITAÚ UNIBANCO HOLDING.

The result of the last ICAAP – which was dated December 2018 – indicated that ITAÚ UNIBANCO HOLDING has, in addition to capital to cover all material risks, a significant capital surplus, thus assuring the solidity of the institution's equity position.

In order to ensure that ITAÚ UNIBANCO HOLDING is sound and has the capital needed to support business growth, the institution maintains PR levels above the minimum level required to face risks, as demonstrated by the Common Equity, Tier I Capital and Basel ratios.

The Basel Ratio reached 16.3% as at June 30, 2019, 1.7 p.p. lower than at December 31, 2018, mainly due to the payment of additional dividends on 2018 earnings.

Additionally, ITAÚ UNIBANCO HOLDING has a surplus over the required minimum Referential Equity of R\$ 70,507 million, well above the ACP of R\$ 29,645 million and generously covered by available capital.

		06/30/2019				12/31/2018				
	Ame	Amount		Ratio		unt	Ratio			
	Required	Current	Required	Current	Required	Current	Required	Current		
Common Equity Tier I	38,115	115,498	4.5%	13.6%	36,813	123,358	4.5%	15.1%		
Additional Tier I Capital	-	10,875	-	-	-	7,796	-	-		
Tier I (Common Equity Tier I + Additional Tier I Capital)	50,820	126,373	6.0%	14.9%	49,084	131,154	6.0%	16.0%		
Tier II	-	11,894	-	-	-	15,874	-	-		
Referential Equity (Tier I + Tier II)	67,760	138,267	8.0%	16.3%	70,559	147,028	8.625%	18.0%		
Amount Required for Additional Capital Buffers (ACP)	29,	29,645		3.5%		19,429		5%		

The fixed assets ratio shows the commitment percentage of adjusted Referential Equity with adjusted permanent assets. ITAÚ UNIBANCO HOLDING falls within the maximum limit of 50% of adjusted RE, established by BACEN. At 06/30/2019, fixed assets ratio reached 27.7%, showing a surplus of R\$ 30,835.

Further details on Risk and Capital Management of ITAÚ UNIBANCO HOLDING and indicators of the Global Systemic Importance Index, which are not included in the financial statements, may be viewed on www.itau.com.br/relacoes-com-investidores "Reports"/ Pillar 3 and Global Systemically Important Banks.

V - Recovery Plan

In response to the latest international crises, the Central Bank published Resolution No. 4,502, which requires the development of a Recovery Plan by financial institutions within Segment 1, with total exposure to GDP of more than 10%. This plan aims to reestablish adequate levels of capital and liquidity above regulatory operating limits in the face of severe systemic or idiosyncratic stress shocks. In this way, each institution could preserve its financial viability while also minimizing the impact on the National Financial System.

More details on the Recovery Plan can be viewed at www.itau.com.br/relacoes-com-investidores, section "Reports / Pillar 3 and Global Systemically Important Banks / Risk and Capital Management – Pillar 3".

VI - Stress testing

The stress test is a process of simulation of extreme economic and market conditions in the institution's results and capital. The institution has conducted this test since 2010 with a view to assessing its solvency in plausible scenarios of a systemic crisis, and identifying areas that are more susceptible to the impact of stress and can be subject to risk mitigation.

To perform the test, macroeconomic variables for each stress scenario are estimated by the economic research department. The scenarios are defined according to their importance to the bank's results, and the probability of occurrence, and they are submitted to the approval of the Board of Directors on an annual basis.

Projections of macroeconomic variables (e.g. GDP, benchmark interest rate and inflation) and of the credit market (such as fundraising, loans, default rate, spread and fees) for these scenarios are based on external shocks or by using models validated by an independent area.

These projections affect the budgeted result and balance sheet, which in turn influence the risk-weighted assets and capital and liquidity ratios.

The stress test is also an integral part of ICAAP, with the main purpose of assessing whether, even in severe adverse conditions, the institution would have appropriate capital levels and its business would be unaffected.

This information allows potential risk factors to be identified in business, supporting the Board of Directors' strategic decisions, the budgetary process and discussions on credit granting policies, in addition to being used as input for risk appetite metrics.

Further details on Risk and Capital Management of ITAÚ UNIBANCO HOLDING and indicators of the Global Systemic Importance Index, which are not included in the financial statements, may be viewed on www.itau.com.br/investor-relations, section "Reports"/ Pillar 3 and Global Systemic Importance Index.

VII - Leverage Ratio

The Leverage Ratio is defined as the ratio of Capital Tier I to Total Exposure, calculated pursuant to BACEN Circular 3,748, of February 27, 2015. The purpose of this ratio is to be a simple measure of leverage not sensitive to risk, thus it does not consider weighting or mitigation factors. According to instructions in BACEN Circular Letter 3,706, of May 5, 2015, since October 2015 ITAÚ UNIBANCO HOLDING has sent the Leverage Ratio to BACEN, in accordance with Basel recommendations, on the basis of the ratio's behavior for the period between 2011, when it was introduced, and 2017.

More information on the composition of the Leverage Ratio, which is not part of the financial statements, is available at www.itau.com.br/investors-relations, section "Corporate Governance" / Risk and Capital Management - Pillar 3.

d) Management Risks of insurance and private pension

I - Management Structure, roles and responsibilities

In line with good domestic and international practices, ITAÚ UNIBANCO HOLDING has a risk management structure that ensures that the risks arising from insurance, pension plans and capitalization products are properly monitored and reported to the appropriate bodies. The management process of insurance, pension plans and capitalization risks is independent and focuses on the specific nature of each risk.

ITAÚ UNIBANCO HOLDING has committees to define the management of funds from the technical reserves for insurance and private pensions, to issue guidelines for managing these funds with the objective of achieving long term returns, and to define valuation models, risk limits and strategies on allocation of funds to specific financial assets. The members of these committees are not only executives and those directly responsible for the business management process, but also heads and coordinators of commercial and financial areas.

II - Risks of Insurance and Private Pensions

ITAÚ UNIBANCO HOLDING offers its products to customers through a bancassurance structure or direct distribution. Life, personal accident, loan and multiple peril insurance products are mainly distributed by a bancassurance operation.

Life insurance and pension plans are, in general, medium or long-term products and the main risks involved in the business may be classified as biometric, financial and behavioral.

- Biometric risk relates to: i) a greater than expected increase in life expectancies for products with survivorship coverage (mostly pension plans); and ii) a greater than expected decrease in mortality rates for products with life coverage (mostly life insurance).
- Financial risk: is inherent in the underwriting risk of products that offer a contractual financial guarantee, this risk being considered insurance risk
- Behavioral risk relates to a greater than expected increase in the rates of conversion into annuity income, resulting in increased payments of retirement benefits.

Estimated actuarial assumptions are based on the past experience of ITAÚ UNIBANCO HOLDING, on market benchmarks and on the experience of the actuaries.

a) Effect of changes on actuarial assumptions

To measure the effects of changes in the key actuarial assumptions, sensitivity tests were conducted in the amounts of current estimates of future liability cash flows. The sensitivity analysis considers a vision of the impacts caused by changes in assumptions, which could affect the income for the period and stockholders' equity at the balance sheet date. This type of analysis is usually conducted under the *ceteris paribus* condition, in which the sensitivity of a system is measured when one variable of interest is changed and all the others remain unchanged. The results obtained are shown in the table below:

	Impact in Results and Stockholders' Equity ^(*)							
Sensitivity Test	06/30/2	019	12/31/2018					
	Private Pension	Insurance	Private Pension	Insurance				
Mortality Rates								
5% increase	(22)	3	15	(1)				
5% decrease	21	(4)	(16)	(1)				
Risk-free Interest Rates								
0.1% increase	60	11	30	8				
0.1% decrease	(61)	(11)	(44)	(8)				
Conversion in Income Rates								
5% increase	(19)	-	(14)	-				
5% decrease	19	-	14	-				
Claims								
5% increase	_	(42)	-	(37)				
5% decrease	-	42	-	37				

^(*) Amounts net of tax effects.

For ITAÚ UNIBANCO HOLDING, there is no product concentration in relation to insurance premiums, reducing the risk of product concentration and distribution channels.

	04/0	1 to 06/30/2	019	04/01 to 06/30/2018		01/01 to 06/30/2019			01/01 to 06/30/2018

III) Market, credit and liquidity risk

a) Market risk

Market risk is analyzed, in relation to insurance operations, using the following metrics and sensitivity and loss control measures: Value at Risk (VaR), Losses in Stress Scenarios (Stress Test), Sensitivity (DV01-Delta Variation) and Concentration. In the table, the sensitivity analysis (DV01 – Delta Variation) is presented in relation to insurance operations that demonstrate the impact on the market value of cash flows when submitted to a one basis point increase in the current interest rate or indexer rate and one percentage point in the share price and currency.

·	06/30/201	9	12/31/2018			
Class	Account balance	DV01	Account balance	DV01

Post-fixed assets	5,016	-	4,085	-		
Under agreements to resell	3,722	_	5,575	_		

b) Liquidity Risk

Liquidity risk is identified by ITAÚ UNIBANCO HOLDING as the risk of lack of liquid resources available to cover its current obligations at a given moment. For insurance operations, the liquidity risk is managed continuously by monitoring payment flows against liabilities, compared to the inflows generated by its operations and financial assets portfolio.

Financial assets are managed in order to optimize the risk-return ratio of investments, considering, on a careful basis, the characteristics of their liabilities. The risk integrated control considers the concentration limits by issuer and credit risk, sensitivities and market risk limits and control over asset liquidity risk. Thus, investments are concentrated in government and private securities with good credit quality in active and liquid markets, keeping a considerable amount invested in short-term assets, available on demand, to cover regular needs and any liquidity contingencies. Additionally, ITAÚ UNIBANCO HOLDING constantly monitors the solvency conditions of its insurance operations.

⁽²⁾ DU = Duration in months.

⁽³⁾ Excluding PGBL / VGBL reserves allocated in variable income.

c) Credit Risk

I - Reinsurers

Reinsurance operations are controlled through an internal policy, in compliance with the provisions of the regulatory authority governing the reinsurers with which ITAÚ UNIBANCO HOLDING operates.

We present below a breakdown of the risks assigned by ITAÚ UNIBANCO HOLDING's subsidiaries to reinsurance companies:

- Insurance Operations: reinsurance premiums operations are basically represented by: IRB Brasil Resseguros with 96.88% (78.13% at 12/31/2018).
- **Private Pension Operations:** related to reinsurance premiums are entirely represented by Austral with 40%, General Reinsurance with 30% and IRB Brasil Resseguros with 30% (same percentages (%s) noted at 12/31/2018).

II - Premiums Receivable

ITAÚ UNIBANCO HOLDING considers the credit risk arising from past-due premiums immaterial, since cases with coverage payment in default may be canceled, pursuant to Brazilian regulations.

III - Risk level of financial assets

The table below shows insurance financial assets, individually evaluated, classified by rating:

	06/30/2019

Note 33 - Supplementary information

a) Acquisition of minority interest in Edenred Participações S.A.

On September 4, 2018, ITAÚ UNIBANCO HOLDING, through its subsidiary ITAÚ UNIBANCO, entered into a strategic partnership with Edenred Participações S.A. (EDENRED) in the benefits market for workers covered mainly by PAT, the Workers' Meals Program. EDENRED is the parent company of Ticket Serviços S.A. (TICKET) in Brazil.

The strategic partnership will enable ITAÚ UNIBANCO to add the benefits issued by TICKET to its current range of products and services for customers in the wholesale, medium, micro and small company segments.

In addition, ITAÚ UNIBANCO will make a minority investment of 11% in TICKET, contributing an amount in cash to a capital increase equivalent to this share in the company's capital, and will also grant the right to exclusive distribution of Ticket Restaurante, Ticket Alimentação, Ticket Cultura and Ticket Transporte products to the ITAÚ UNIBANCO corporate customer base during the life of the partnership. TICKET will continue distributing its products through other commercial agreements and will continue under EDENRED's control and management.

Regulatory approvals were granted on February 18, 2019 by the Central Bank of Brazil (BACEN) and on June 26, 2019 by the Brazilian Antitrust Authority (CADE). Financial settlement will be made on a date after the Financial Statements approval.
